MasterSeries® **LF870V Double Check Backflow**

Prevention Assemblies

Size: 21/2" - 10"

The FEBCO MasterSeries LF870V Double Check Assembly is specifically designed to protect against possible backpressure and backsiphonage conditions for non-health hazard (i.e., pollutant) application in accordance with Local Governing Water Utility Code. This Backflow Assembly is primarily used on potable drinking water systems where Local Governing Code mandates protection from non-potable quality water being pumped or siphoned back into the potable water system.

The coating on this backflow assembly uses ArmorTek™ technology to resist corrosion due to microbial induced corrosion (MIC) or exposed metal substrate. The LF870V features Lead Free* construction to comply with low lead installation requirements. The Lead Free* Double Check Assembly shall comply with state codes and standards, where applicable, requiring reduced lead content.

Features

- Inline Serviceable Assembly
- Horizontal "N-Pattern" Installations
- Vertical-Up "Z-Pattern" Installations
- No Special Tools Required for Servicing
- Captured Modular Spring Assembly
- Reversible & Replaceable Discs
- Field Replaceable Seats
- Ductile Iron Valve Body Design
- Stainless Steel Check Components
- Utilizes advanced ArmorTek[™] coating technology to resist corrosion of internals
- · Winterization feature with disc retainers and valve body drain ports
- Clapper Check Assembly
- Commonality between 1st & 2nd Check Components
- Captured O-ring Design

check modules with replaceable seats and disc rubbers. Servicing of both check modules does not require any special tools and are accessed through independently top entry covers. This assembly shall be fitted with AWWA Compliant inlet/outlet resilient seated shutoff valves; when used on a Fire-Sprinkler application, the assembly shall be fitted with approved UL/FM inlet/outlet resilient seated shutoff valves and contain four (4) properly located resilient seated test cocks as specified by AWWA Standard C510. The valve body shall utilize a coating system with built in electrochemical corrosion inhibitor and microbial inhibitor. The assembly shall be approved for horizontal and/or vertical-up installations while meeting the requirements of AWWA Standard C510 flow and pressure loss performance parameters.

NOTICE

The information contained herein is not intended to replace the full product installation and safety information available or the experience of a trained product installer. You are required to thoroughly read all installation instructions and product safety information before beginning the installation of this product.

NOTICE

Inquire with governing authorities for local installation requirements

*The wetted surface of this product contacted by consumable water contains less than 0.25% of lead by weight.

MODEL LF870V DOUBLE CHECK ASSEMBLY (Shown in standard orientation)

The FEBCO MasterSeries LF870V Double Check Valve Assembly shall be installed on the potable water supply and at each point

of cross-connection to protect against possible backpressure and

applications. The assembly shall consist of a main line valve body

composed of two (2) independently acting approved clapper style

backsiphonage conditions for non-health hazard (i.e., pollutant)

Specifications

Options - Suffix

- OSY: UL/FM Approved OS&Y Gate Valves [ANSI/AWWA C515 Compliant]
- Non-Rising Stem Gate Valves [ANSI/AWWA C509 NRS: Compliant]
- LG: Less Shut-off valves; This is NOT an APPROVED ASSEMBLY

Example Ordering Description:

4" LF870V-OSY - Valve Assembly fitted with OS&Y Shutoff Valves

Available Components

Wye Strainer: FDA Approved [ASME B16.1 Class 125 & AWWA Class D Flange]

Series 611 Valve Setter: MJ x MJ - Mechanical Joint x Mechanical Joint [AWWA C111/A21.11]

> MJ x FL - Mechanical Joint x Flange [AWWA C111/A21.11; ASME B16.1 Class 125/AWWA Class D Flange]

> FL x FL - Flange x Flange [ASME B16.1 Class 125 & AWWA Class D Flange]

Assembly Flow Orientation:

Horizontal (N-Pattern 2½" – 10") - A	Approved by FCCCHR-USC, ASSE, cULus, FM, IAPMO
Vertical Up (Z-Pattern 21/2" - 10") - /	Approved by FCCCHR-USC, ASSE, cULus, FM, IAPMO

es Please contact your local FEBCO Representative if you require further information.

Approvals – Standards:

- Approved by the Foundation for Cross-Connection Control and Hydraulic Research at The University of Southern California [FCCCHR-USC]
- ASSE 1015 Listed
- **UL Classified [US & Canada]
- **FM Approved
- IAPMO
- AWWA Standard C510 Compliant
- End Connections: Compliant to ASME B16.1 Class 125 & AWWA Class D Flange
- **Assembly configured with UL/FM Approved OS&Y RW Gate Valves. Less gate valve assemblies are not UL/FM approved configurations.

Pressure - Temperature

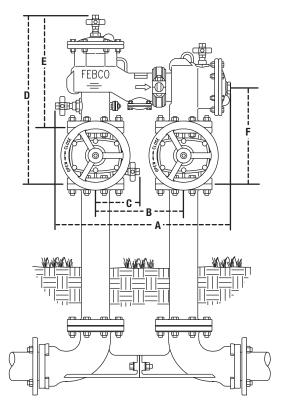

Max. Working Pressure:	175psi (12.1 bar)
Min. Working Pressure:	10psi (0.7 bar)
Hydrostatic Test Pressure:	350psi (24.1 bar)
Hydrostatic Safety Pressure:	700psi (48.3 bar)
Temperature Range:	33°F - 140°F (0.5°C- 60°C) Continuous

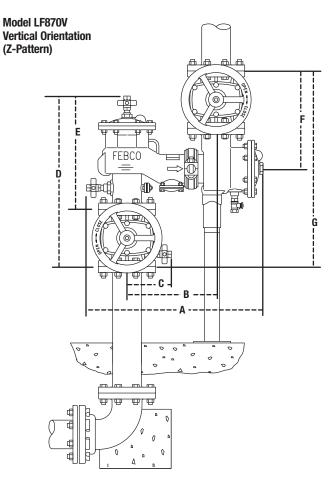

Dimensions – Weights

Below are the nominal dimensions and physical weights for the Model LF870V size 2½" through 10". Allowances must be made for normal manufacturing tolerances. Please visit our website to download a copy of this product's installation instructions, or contact your local FEBCO Representative for more information.

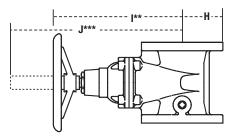

Model LF870V Standard Orientation (N-Pattern)

Note: The Model LF870V is shipped in the standard (N-Pattern) orientation as shown above.

Flow capacity chart identifies valve performance based upon rated water Velocity up to 20fps

- Maximum service flow rate is determined by maximum rated Velocity of 7.5 fps.
- AWWA Manual M-22 (Appendix C) recommends that the maximum water Velocity in the services be not more than 10fps.
- UL flow rate is determined by typically rated Velocity of 15 feet/sec.
