A	 <p>Fence Panel</p>	4
B	 <p>Spike</p>	8

RECOMMENDED TOOLS (not included)	
	Tape Measure
	Mallet
	Wooden Block
	Gloves

⚠️ WARNING:

Manufacturer and seller expressly disclaim any and all liability from personal injury, property damage or loss, whether direct or indirect, or incidental, resulting from the incorrect attachment, improper use, inadequate maintenance, or neglect of this product.

INSTALLATION

1. Carefully measure the space between two stake on the fence panels. **NOTE:** Spike spacing must be precise for panels to align properly with the spikes and each other.
2. Use a block and a rubber mallet to drive the spikes into the soil until the spike supports are fully beneath the soil surface.
3. Slide the first fence panel onto the first two spikes.
4. With assistance, align the hook on the second panel with the mounting hole on the first panel while aligning the bottom of the fence panel with the second set of installed spikes. **NOTE:** If panels do not align properly, you may need to adjust the location of the spikes.

General Use & Care

This fencing is for decorative purposes only and is not intended for containment, safety, or security purposes.

INSTALLATION: Install into firm soil that is free of rocks and tree roots. Do not attempt to install fencing into rocks, sand or loose soil as doing so could result in the fence leaning or tipping over or permanently damage the powder coating.

INSPECT: Periodically check that spikes are firmly in the ground and panels are linked.

CLEANING: Wet a soft cloth with clean water and wipe away dirt and debris. Dry with a soft cloth.

SCRATCHES: The powder coating on the fencing is tough & durable but, even under normal use, some scratching is inevitable. Scratches can be repaired with a rust-resistant paint.

WINTER CARE & STORAGE: Store this item during winter, especially in locations with ice and snow. Move fencing to an indoor location that is dry. Covering with a breathable cover while in storage will help prevent dust build-up.

WARNING: THE ONE-YEAR WARRANTY DOES NOT COVER DAMAGES OR DEFECTS CAUSED BY THE APPLICATION OF TOUCH-UP PAINT, CHEMICAL TREATMENTS, OR PROTECTIVE COATINGS.

Troubleshooting

THE FENCE SPIKES WON'T GO FAR ENOUGH INTO THE GROUND

- Check for obstacles beneath the soil such as rocks, tree roots, or pavement.
- The soil may be too dry. Soak the soil with water and try inserting the spike(s) again.

THE FENCE PANELS LEAN AFTER INSTALLATION

- Firmly step on the soil near the spike(s) and push the it towards the spike.
- Soil may be too loose to support the panels. Remove fencing, pack down soil and reinstall.

Any modification to the product or failure to follow recommended care will void the product warranty.
