

Cut Wheel Dressing and Maintenance

To Dress:

Use a diamond dressing tool to dress the wheel. Dressing is required when the wheel becomes dull or when the wheel is used to cut a new material.

1. Turn the wheel on the lathe.
2. Use the diamond dressing tool to dress the wheel. Dressing is required when the wheel becomes dull or when the wheel is used to cut a new material.
3. Use the diamond dressing tool to dress the wheel. Dressing is required when the wheel becomes dull or when the wheel is used to cut a new material.
4. Use the diamond dressing tool to dress the wheel. Dressing is required when the wheel becomes dull or when the wheel is used to cut a new material.
