

# PEX Bend Supports

Professional and reliable installations with fewer leak points.

B00113

B00111

B00112

Jones Stephens PEX bend supports offer an easy way to create a 90° bend, eliminating the need for fittings in most cases and reducing the number of potential leak points. Using bend supports in PEX installations provides reliable support and prevents damaging kinks or sags. Bend supports also limit pipe vibration and movement, minimizing noise and contact with nearby infrastructure.

## Durable & Reliable

- Constructed of glass-reinforced nylon for strength and durability
- Meets IAPMO PS42 standard
- cUPC listed

## Versatility & Compatibility

- Options for mounting to studs, walls or Jones Stephens Adjustable Pipe Support Brackets
