

Let us
entertain
you

As part of the 600 Custom series, IW 606 FG has a rich, open acoustic perspective and the unique Jamo SoundAngle technology, which makes it possible to angle sound (30 degrees) downward, ideal for when you want to place your speakers high above the listening position. It is the perfect choice for extending or boosting your Jamo C 600 series sound system, without having to add more box speakers.

The speaker's plastic 'bridge' make installation very easy as you can safely use this as a handle leaving your other hand free for holding a drill, screwdriver etc. The speaker is a one-piece item which means that you only needs to make one visit to the customer to mount it.

The grille covers the whole of the speaker which makes painting the product both simpler and quicker as you don't need to paint the speaker itself.
