

STEELMAN™ PRO

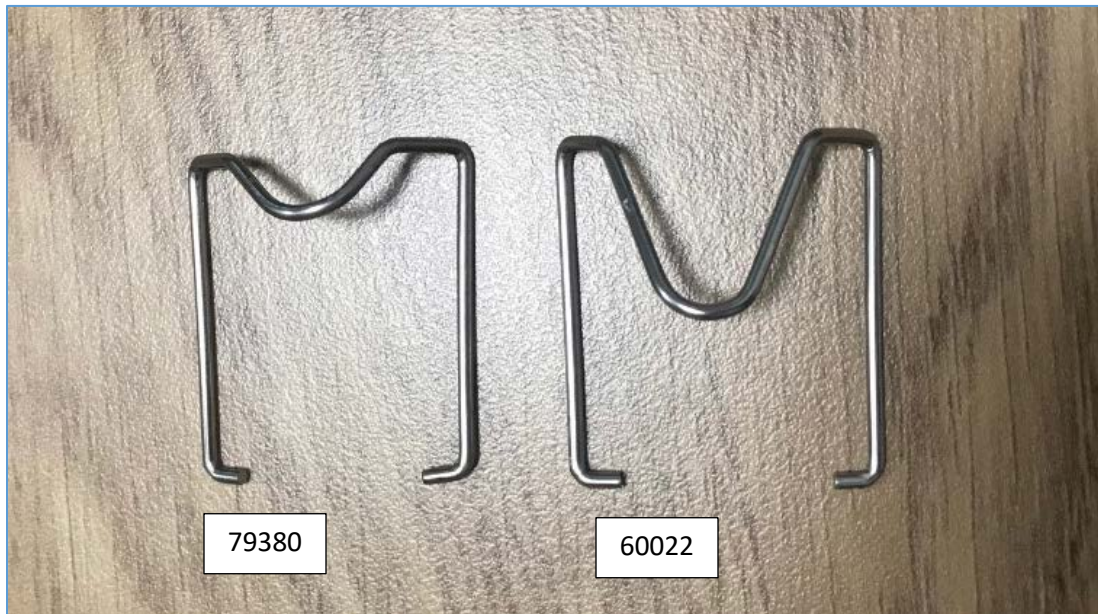

Steelman Pro Headlamp Hard Hat Clip

Replacement Instructions

Replacement part numbers:

79380 (version 2, shorter hook showed on the left)

60022 (version 1, longer hook showed on the right)

The different size hooks will allow more secured hold on different hard hats/helmets. Most headlamps will come with 79380 clips.

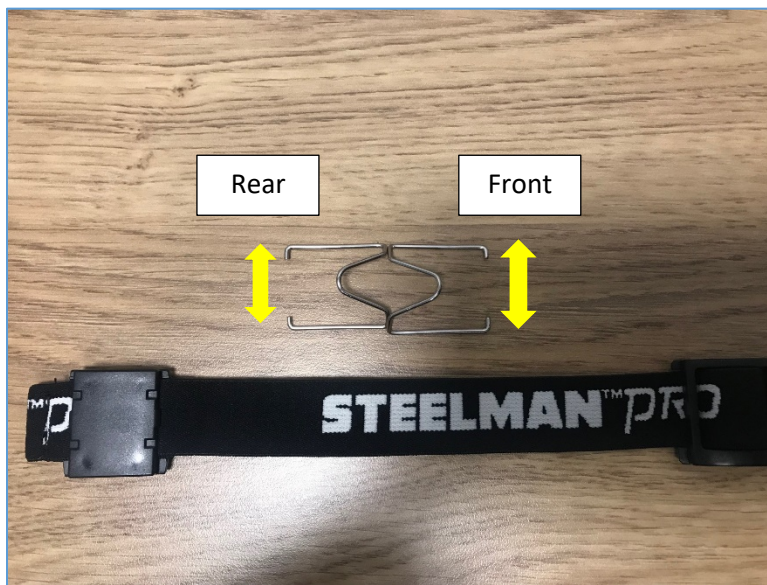

Clips are insulated up to 600V. (Clips shown are not insulated for better visual display in this document)

STEELMAN™ PRO

The open loop clip is the front (next to the headlamp panel)

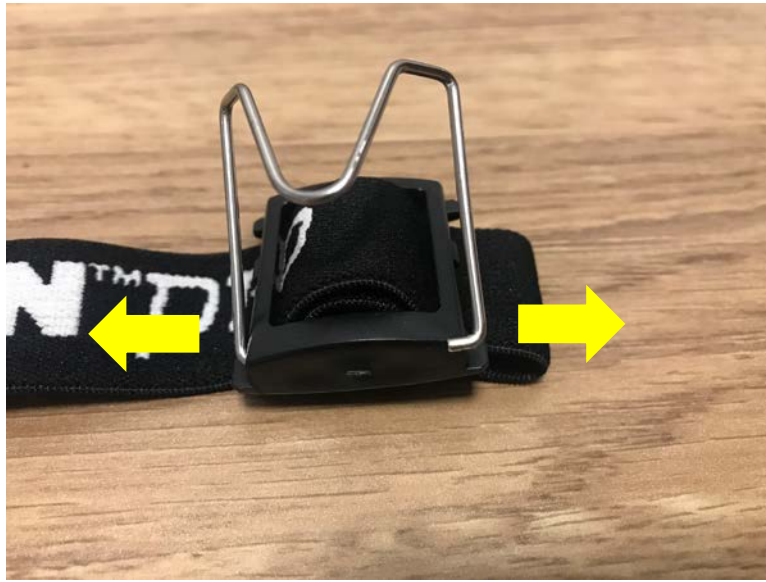

The solid loop clip is the rear (next to the battery box)

Note: The front clip is slightly wider than the rear clip.

STEELMAN™ PRO

Removing and Installing Clips:

Pull the clip outward one side at a time to remove from the strap loop. Repeat for all four loops.

Discard the old/damaged clip, install new clip by inserting bend ear into the hole on each side of the strap loop. Repeat for all four loops.

Fold and unfold the clip few times to make sure the clip is securely installed on to the strap loop.
