

SECURESAFE™ HYPODERMIC NEEDLES

ITEMS 8973

Dynarex SecureSafe Safety Hypodermic Needles provide a reliable solution for administering injections and collecting blood with enhanced user safety. Each sterile needle features a thin wall and double-beveled design to support smooth fluid flow and greater patient comfort. The SecureSafe mechanism includes a quick-cover feature that helps reduce the risk of accidental needlesticks with a simple press-and-snap. Needles are color-coded for fast gauge identification and compatible with both luer lock and luer slip syringes.

- Designed to deliver medication and draw blood safely and effectively
- Safety mechanism with quick cover helps protect against accidental needlesticks
- Double-beveled, thin-walled needle helps improve patient comfort
- Compatible with luer lock and luer slip syringes
- Color-coded needle hub allows for quick identification of needle gauge
- Sterile, non-toxic, and disposable
- Not made with natural rubber latex
- 100 syringes per box, 10 boxes per case
