12V Compact Tire Inflator

OPERATOR'S MANUAL

Your tire inflator has been engineered and manufactured for dependability, ease of operation, and operator safety. When properly cared for, it will give you years of trouble-free performance.

AWARNING

Please read and save these instructions. Read carefully before attempting to assemble, install, operate or maintain the product described. Protect yourself and others by observing all safety information. Failure to comply with instructions could result in personal injury and/or property damage! Retain this manual for future reference.

For assistance with this product call 800-426-1262 between 7 a.m. and 4 p.m. Pacific time.

TROUBLE SHOOTING

INFLATOR DOES NOT WORK WHEN SWITCHED TO "ON"

- · Power cord may not be plugged in completely. Check the connection.
- · Check vehicle power outlet and power plug terminals for dirt. Use a nonconductive probe, not fingers or metal, to
- · Check vehicle power outlet fuse, which should be a minimum of 15 Amps.
- · Fuse may have blown. Check fuse in power plug adaptor and replace if necessary with one of the same amperage. NEVER replace a blown fuse with a fuse having a higher rating.

UNIT IS RUNNING BUT TIRE IS NOT INFLATING

- · Check that the air hose connector is attached properly to the tire valve stem.
- · Check for tire leaks or damage, and check air hose for breaks and leaks at

INFLATOR FEELS HOT OR RUNS

- · Unit may have overheated. Shut the unit off and allow to cool for 20-25 minutes.
- · NEVER use this inflator for more than 10 minutes continuously.
- · Voltage may be too low. Check condition of vehicle battery.
