

PROTECTION/CLEANING

Clean parts after each use to keep your Fusion in working condition. Keep away from water and extremely hot or cold temperatures. Always turn the battery off after each session and before cleaning.

To clean the battery connection, use a q-tip slightly dipped in rubbing alcohol. Avoid soaking with excess alcohol, and swab the area where the coil connects to the battery. Allow to dry completely before use.

To clean the coils, unscrew the coil from the battery. Soak a q-tip with rubbing alcohol and scrub the inside of the coil to remove oil and resin build-up. If stubborn residue remains, replace the coil with a fresh one. Use an alcohol wipe to clean the battery and mouthpiece to sanitize between uses. Allow to dry before use.

WARRANTY

→ **AUTHENTICATION
CODE**

Register your battery by entering the authentication code printed on the battery. OOZELIFE.COM/PAGES/WARRANTY

Warranty does not apply to Ooze batteries at fault from use of non-Ooze charger, or if there is any indication of physical damage done to the battery.
