

CRC Industries NZ, Auckland NZ

**I. Product Description**

CRC Weld Anti-Spatter WB is a heavy duty, non-flammable, water based lubricant that has been specially formulated with a blend of release agents to prevent welding spatter from permanently adhering to surrounding metal surfaces.

CRC Weld Anti-Spatter WB can be applied quickly and with its heat resistant coating, works efficiently to make clean-up easy, with no chiselling, grinding, or brushing necessary.

The water-based film is easily removed by simply wiping with a cloth or rag, and is silicone free, meaning post-welding coatings can be applied with no interference.

MPI C12 Approved

**II. Application and Directions**

1. Always read entire label before using product.
2. Shake well and hold can 25-30cm from surface.
3. Spray a light even film on surface to be welded. Do not over apply.
4. After welding, wipe or clean away the thin film before applying any post-welding applications, e.g. painting or hot dip or cold galvanising.

**III. Features & Benefits**

Flammability – Residual anti-spatter film remaining on metal surface is non-flammable and non-combustible.

Water-based formula – Allows easy clean up without solvent cleaners, allows part to be welded while wet.

Low Odour – Promotes a better work environment and user comfort.

Rust Inhibiting Additive – Prevents flash rust of in-process and surrounding metal surfaces.

Minimises – Paint and Coating adherence problems caused by petroleum and silicone residues.

**IV. Typical Properties and Characteristics**

**Physical Properties:**

Flammability	Non-flammable
Propellant	Dimethyl Ether
Temperature Range	0°C to +150°C

**Performance Characteristics:**

Type of film	Emulsion
--------------	----------

**V. Package Description**

Part Number	Size
3359	400ml
