JR-128 JACKET RIPPER

The Seatek™ JR-128 Jacket Ripper does just that - it makes removing cable jackets an easy process. Our lightweight Jacket Ripper prevents the nicking of internal conductors while precisely cutting through layers of medium and large multi conductor cable. This tool is a safer alternative to razor blades or knives, and can help you get the job done. The JR-128 is made in the USA.

STRIP PLASTIC JACKETS

REPLACE BLADE EASILY
