### Wireless Door/Window Sensor

Introducing the world's first wireless sensor with **Bluefield™** LED technology. Now installing security has never been faster, easier, or more reliable.

## BLUE FIELD Quicker and More Accurate Installations

The Versa wireless sensor is equipped with **Bluefield™**, a magnetic field indicator that illuminates when a magnet comes within range of the sensor. This removes all guesswork of magnet placement as now, for the first time, an installer can see the magnetic gap and no longer has to rely on the chime of a control panel. A green transmission LED also glows when the sensor is being tripped during installation. This allows the installer to see if the sensor is working properly and if a signal is being sent to the control panel.

(These functions turn off 3 minutes after the cover is installed to conserve battery life.)

### Product Features

- > Compact low-profile design for unobtrusive installations
- > Visible **Bluefield™** LED for easy and optimal magnet placement
- > Signal transmission and low battery LED indicators
- > Exceptional wireless range (500+ ft.)
- > Fully supervised
- > Replaceable CR2032 lithium battery (5+ years)
- > Tamper resistant case
- > Compatible with 2GIG, DSC, GE, and HAI wireless systems
- > FCC and IC approved
- > 2 year warranty

### Low-Battery LED Indicator

A red LED indicator flashes at 5 second intervals when a low battery condition is detected. This is an invaluable visual aid for homeowners and installers to locate which battery needs replacing. The information is also transmitted to the control panel.

## Specifications

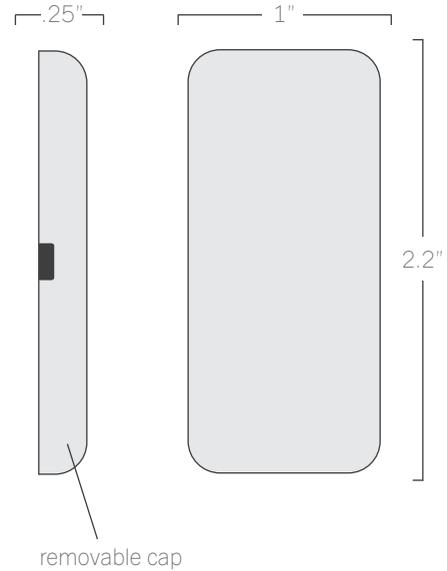

Battery	Panasonic CR2032, 3VDC, 225mAh Lithium Coin Cell (Replaceable)
Battery life	5-8 years (typical)
Technology	Crystal
Unique ID Codes	16 million
Magnet Type	Rare Earth N45
Sensor dimensions (WxHxD)	1" x 2.2" x 0.25"
Magnet Dimensions	0.25" x 0.25" x 1"
Enclosure	ABS Plastic (UV Stabilized)
Color	White
Operating Temperature	32 (0C) to 120 (50C)
Weight	0.4 oz
Regulatory Approvals	FCC, IC

## Part Numbers

<b>Versa-2GIG</b>	Compatible with 2GIG
<b>Versa-DSC</b>	Compatible with DSC 433MHz
<b>Versa-GE</b>	Compatible with GE/Interlogix
<b>Versa-HAI</b>	Compatible with HAI/Leviton
