

Instructions for Fountain Assembly

Assembly of the Bottom Portion of the Fountain

STEP 1 Insert the pump cord through large bowl B and pedestal base A. Position electrical cord through slot at bottom with pedestal base.

STEP 2 Inset, twist and lock pedestal base A to the large bowl B.

STEP 3 Pull the pump H through the bottom of the medium pedestal C.

STEP 4 Insert, twist and lock the medium pedestal C to the large bowl B. The pump will be inside the medium pedestal C.

STEP 5 Insert and twist medium bowl D to medium pedestal C. You have now completed the bottom portion of the fountain assembly.

Assembly of the Top Portion of the Fountain

STEP 6 Drop the connected water tube from the topper G through the small bowl F.

STEP 7 Insert, twist and lock the topper G to the small bowl F.

STEP 8 Drop the water tube from Step 7 through the small pedestal E. You have now completed the top portion of the fountain assembly.

Final Assembly

STEP 9 Drop the water tube from Step 8 through the medium bowl D and the medium pedestal C.

STEP 10 Insert, twist and lock the top portion of the fountain to the bottom portion of the fountain.

STEP 11 Connect the water tube to the pump in pedestal C.

STEP 12 Make certain the pump is sitting on the bottom of the large bowl B inside pedestal C. The pump should be at this point so pump will work properly.

STEP 13 Fill water basin with at least 3 1/2" of water. There should be enough water to reach above the bottom of the fountain top figure, and to fully submerge the pump. The pump must be fully submerged to operate properly and prevent pump damage.

STEP 14 Plug pump cable into electrical socket, being careful to create a drip loop with the cable before connecting to the socket.

Parts List

A. Pedestal Base

C. Medium Pedestal

E. Small Pedestal

G. Topper with Rubber Tube

B. Large Bowl

D. Medium Bowl

F. Small Bowl

H. Pump
