Positioning

Positioning the sound bar in front of a TV

Position the sound bar in front of your TV, etc., on a flat surface.

NOTE

- When positioning the sound bar in front of your TV, make sure the sound bar does not obstruct the TV's remote control light sensor, etc.

Hanging the sound bar on a wall

The sound bar can be mounted on a wall using the two keyholes provided on the back of the bar for this purpose. When hanging bar on a wall, position it in a flat, vertical position.

To ensure safety, it is best to employ a contractor to mount the sound bar on the wall.

NOTE

- In order to use the unit safely, do not place items on or hang items from the unit.
- Do not attempt to install the sound bar onto a wall made of material that may crumble easily, such as mortar or decorative plywood. Doing so may result in the screw pulling out and the sound bar falling, causing injury or damage to the sound bar.
- The included HDMI cable have ferrite cores. When hanging the sound bar on a wall, make sure not to put the ferrite core between the sound bar and the wall.
- Be sure to fix connection cables to the wall to ensure that the cables cannot be pulled or tripped over, which may cause the unit to fall. Check that the unit is mounted safely after the mounting work is complete.
- Also, periodically check that the unit is mounted solidly and that there is no possibility that the unit could fall.
- Denon cannot accept any responsibility for damage, injury or accidents caused by problems with the mounting location or mounting method.

(A) Depth of the mounted TV	(B) Required space between the bottom of the TV and the top of the sound bar
Less than 2.5 in. (64 mm)	More than 2 in. (50 mm)
2.5 in. – 4.5 in. (64 – 102 mm)	More than 4 in. (102 mm)
More than 4 in. (102 mm)	More than 7.5 in. (191 mm)

- When hanging the sound bar on a wall, use the included wall mount template.

How to use the wall mount template

- ① Tape the template to the location you would like to mount the sound bar.

Leave enough space between the TV and the sound bar so that the sound from the Atmos speakers on the top of the bar, which projects towards the ceiling, is not blocked by the TV. Refer to the table on the previous page for spacing recommendations. (☞ p. 16)

- ② Screw in the wall mount screws by following the template.

Screw in one self-tapping screw (commercially available, 3/16 in./5 mm to 1/4 in./6 mm diameter) into a wall that has sufficient strength to support the weight of the sound bar, or into reinforcing material on the wall.

- ③ Remove the template from the wall.

- ④ Mount the included wall mount spacers on the back of the sound bar.

The wall mount spacers create a space for cords to pass through between the sound bar and the wall.

- ⑤ Hang the sound bar on the screws.

CAUTIONS

When mounting the speakers on a wall

- The speakers can be mounted on a wall using the keyhole hook on its rear panel.
- When you mount the speakers, be sure to install them properly and securely.

1. Screw in one self-tapping screw (commercially available, 3/16 inch / 5 mm to 1/4 inch / 6 mm diameter) into a wall that has sufficient strength to support the weight of the speaker, or into reinforcing material on the wall.
2. Hook the keyhole hook on the back of the speaker onto the head of the self-tapping screw.

- Check that the head of the self-tapping screw hooks securely into the keyhole hook hole.
- Do not attempt to install this product onto a wall made of material that may crumble easily, such as mortar or decorative plywood. Doing so may result in the screw pulling out and speaker falling, causing damage to the speaker or injury.
- Do not install the speaker using other methods such as nails or double-sided tape. The nails may become loose due to vibration or the double-sided tape may peel off due to prolonged use, causing the speaker to fall.
- Be sure to fix the cables in place so that they cannot be pulled or tripped over by accident.
- Be sure to check that the product is safe after installation. Please note that we cannot accept any liability for accidents, etc. that occur as a result of where or how this product is installed. If you are unsure of how to install this product safely, request a professional contractor do the installation work.
