BL1450U BATTERY BACKUP

Protect desktop computers,
workstations, networking devices,
and home entertainment systems

A mini-tower UPS with line interactive topology, the CyberPower BL1450U provides battery backup (using simulated sine wave output) and surge protection for desktop computers, workstations, networking devices, and home entertainment systems. The BL1450U uses Automatic Voltage Regulation (AVR) to correct minor power fluctuations without switching to battery power, which extends battery life. AVR is essential in areas where power fluctuations occur frequently.

Two USB charge ports, one Type-A and one Type-C, power portable devices such as mobile phones and tablets, even during a utility power failure. The BL1450U comes with a three-year warranty (including coverage of batteries) and a \$400,000 Connected Equipment Guarantee.
