

# INJECTOR SOCKET SET FOR FORD 6.7L 17MM

Item #	Inner	Master	UPC	Packaging
<b>W80608</b>	6	72	039564155079	Carded

- Use for quick damage-free removal and installation of Ford's Power Stroke 6.7L injectors
- This 17 mm 12 point socket set works for all years of the Ford diesel engine
- The long and short flare nut design removes various injector lines at any angle
- Use the long socket for the clearance required to properly torque the fuel lines

- High quality steel construction, built to withstand the high torque demands of diesel injector work
- 12 point design ensures a secure grip on the injector's hexagonal shape, minimizing the risk of slippage
- A versatile tool, compatible with a range of Ford V8-6.7L Power Stroke engines within the category
