Pentel[®]

Our Vision

We create the tools that enable people everywhere to give form to their inner thoughts and feelings, and to cultivate the joy of expressing themselves.

Celebrating Over 70 Years of Self-Expression, Imagination and Creativity

From its early beginnings in 1946, Pentel was founded to help people express themselves by placing their thoughts on paper or canvas. Our International Children's Art Exhibition is about to enter its 50th year in an effort to support arts education in schools. We have remained committed to fostering self-expression by supplying innovative, high-quality products artists, students and professionals prefer.

Ground-Breaking Innovations and Award-Winning Quality

Innovation and Quality is in our DNA. Pentel invented rollerball technology, the first mechanical pencil (including the first side-advance automatic pencil) and pioneered graphite lead manufacturing. Pentel introduced the world to the earliest gel pens and our scientific experts at Pentel Labs continue to perfect ink technology to provide the ultimate writing experience.

Pentel is the only writing instrument company to receive the Deming Award in recognition of the highest standard of quality. Every Pentel product is developed, tested and manufactured in our own factories. We not only make our own products; we also make the machinery that sorts, assembles and tests each product – and then back them all with a lifetime warranty.

A Proven Track Record of Environmental Responsibility

Pentel was "green" long before Kermit the frog. Pentel won its first environmental award way back in the 1970s and follows green corporate policies focused on minimizing our carbon footprint. We reduce, reuse and recycle in every aspect of our business and proudly offer a wide variety of environmentally-friendly writing instruments under our Recycology™ program.

We Can't Do It Alone

We strive for perfection in all aspects of our business and know that the biggest contributor to our success is not our art contests, manufacturing processes or global stewardship efforts; it's the people we partner with and the relationships we build. We thank everyone that sells, recommends or uses Pentel products and look forward to a rewarding relationship in a bright future.

ORENZ™

UNIQUE ANTI-BREAKING LEAD SYSTEM

SUPER SLIDING SLEEVE™ PREVENTS LEAD FROM BREAKING

The lead automatically feeds out as the protective metal sleeve retracts into the barrel. Once the sleeve fully retracts, simply give it 1-Click and continue writing.

ORENZ™

1-CLICK MECHANICAL PENCIL

- Click only once to extend the unique Super Sliding Sleeve™ and keep writing until the sleeve fully retracts then click only once again
- Lead should not extend past the metal tip – it will write without you actually seeing the lead
- Unique Super Sliding Sleeve prevents lead from breaking – even very fine 0.2mm and 0.3mm lead
- Pre-loaded with Pentel Super Hi-Polymer “B” lead; never needs sharpening and produces a clear dark line. (Can be refilled with HB #2 lead)
- Retractable tip to protect pockets and purses
- Available in 0.2mm, 0.3mm, 0.5mm and 0.7mm lead sizes

Barrel Colors:

Pentel

RECYCOLOGY™

THE SCIENCE OF REDUCE, REUSE AND RECYCLE

THE PENTEL PATH TO RECYCOLOGY™

Pentel created the Recycology™ program to enhance its mission of helping the environment by creating less waste and increasing recycling activity.

At Pentel, we recognize that our natural resources represent our future. We are working hard to make a positive contribution to the environment by minimizing our use of natural resources.

Pentel is focused on protecting natural resources and the environment at all stages of the manufacturing process. In our Recycology™ products, we ensure that all products meet strict environmental standards and use both recycled content and post-consumer recycled content in these products.

PATH TO RECYCOLOGY TIMELINE:

The Pentel Ibaraki Factory was recognized and honored for its waste water treatment facilities and its participation in environmental friendly programs.

Pentel completely abolished the use of substances which are harmful to the ozone layer.

Pentel adopted the "Pentel Guidelines of Corporate Activities", which details our corporate social responsibility and intention to build a sustainable enterprise.

Pentel carries a full line of products made from recycled plastic in all writing categories.

1974 1992 1995 1996 2005 2007 2019

Pentel Corp. Began cooperation with the World Wide Fund for Nature (WWF), known as the World Wide Fund in the U.S.

Pentel developed the "Pentel Environment Platform" to outline its philosophy of protecting the global environment and controlling pollution.

Pentel instituted the Recycology™ program in which all products are made from a minimum of 50%* recycled materials by weight.

* excluding consumable content and refills

Recycology™ embodies the 3Rs and we hope that you do too: **Reduce, Reuse and Recycle.**

For more information about Semper Fi Fund and its mission, visit www.SemperFiFund.org.

Products bearing ACMI's AP (Approved Product) Seal are certified in a program of toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans or to cause acute or chronic health problems. This program is reviewed by ACMI's Toxicological Advisory Board. These products are certified by ACMI to be labeled in accordance with the Labeling of Hazardous Art Materials Act (LHAMA) and the chronic hazard labeling standard ASTM D-4236. In addition, there is no physical hazard as defined within 29CFR Part 1910. 1200(c).

The CL (Cautionary Labeling) Seal identifies products that are certified by a board certified toxicologist to be properly labeled for any acute or chronic health hazards. The Cautionary Labeling provides information on the safe and proper use of these materials. This Seal appears on only a small percentage of adult art materials in ACMI's certification program and on none of the children's materials. These products are also certified by ACMI to be labeled in accordance with ASTM D 4236 (the chronic hazard labeling standard), the FHSA and LHAMA. Products with this seal Cautionary Labeling are not hazardous if used correctly. It is important to read the product label in full before opening a product that has the CL Seal. These products should never be given to children in grade 6 or lower, or to anyone who is unable to read or understand safety labeling.
