INSTALLATION INSTRUCTIONS

Please read carefully and save these instructions as you may need them a later date.

CAUTION

WARNING: Risk of Fire. Consult a qualified electrician to ensure correct branch circuit conductor.

Turn off the main power at the circuit breaker before installing the fixture in order to prevent possible shock.

GENERAL

All electrical connections must be in accordance with local and National Electrical Code (N.E.C.) standards. If you are unfamiliar with proper electrical wiring connections obtain the services of a qualified electrician.

Remove the fixture and the mounting package from the box and make sure that no parts are missing by referencing the illustration.

ASSEMBLY AND INSTALLATION

1. Install the bulbs (2 not included) into the socket (3). Make sure they do not exceed the maximum wattage specified on the fixture's wattage rating label.

2. Align the top cover (4) onto the top of the fixture body (1), use a Phillips screwdriver (not included) to screw the screws (5) through the holes on the fixture body (1) into the threaded holes on the top cover (4).

3. Connect the ground wire (6) from the fixture to the ground wire (7) from the post. Connect the wire (12) from fixture to the black wire (11 live wire) from post. Cover the three connections using the three wire connectors (8). Position the wires back inside the post cap (13).

4. Place the post cap (13) onto the post.

5. Screw the install screws (14) through the holes on the post cap until the fixture is secure.

6. Turn on the power.

INSTALLATION IS NOW COMPLETED
