Features & Benefits

- Contains a blend of cleaning agents and alkali for removal of dried on food
- Controls discoloration of stainless steel cutlery caused by protein build up

Applications

- Presoak and destainer for plastics, china, utensils and flatware
- Do not use on silver

Suma® Chlorinated Stainless Presoak K6

Use instructions

- Use this product as directed by your Diversey representative
- Suma® Chlorinated Stainless Presoak K6 is designed to be diluted at a rate of 1.0–6.0 oz. / gal. (28.4–170 g / 3.78 L), depending on the soil load, and is used to presoak stainless steel flatware and utensils, prior to washing in a dishmachine.
- Cover or remove all food products from the area prior to using this product
- Do not allow this product or its solutions to splash onto other surfaces
- Dilute this product only with water
- Do not use on silver
- Do not allow undissolved product to contact flatware
- Mix proper strength solution of Suma® Chlorinated Stainless Presoak and warm – 100 to 120° F (38 to 49° C) - water
- Place flatware or utensils in presoak solution for 15–30 minutes
- Remove flatware or utensils from presoak solution, place in racks for dishmachine, and rinse thoroughly with overhead sprayer. Do not pour presoaking solution into dishmachine as it will cause foaming.
- Process flatware and utensils through dishmachine

For Food Plant Use: All food contact surfaces must be thoroughly rinsed with potable water after treatment with this product. Avoid contamination of food during use or storage.

Safe handling

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use; and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. SDS are available online at www.diversey.com or by calling 888.352.2249. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate.
