Problem of the Day

Lesson 1

Solve for the missing sides.

$$P = 56 \text{ feet}$$

15 ft.

15 ft.

Answer: _____ **13 ft**

Lesson 2

Name the figure below and determine its attributes.

Sides: _____ **5**

Edges: _____ **5**

Vertices: _____ **5**

Lesson 4

Examine the table below and use the data to create a dot plot.

| Number of Pets | | | | | |
|----------------|----------------|----------|----------------|----------|----------------|
| Person | Number of Pets | Person | Number of Pets | Person | Number of Pets |
| Person 1 | 1 | Person 4 | 4 | Person 7 | 2 |
| Person 2 | 2 | Person 5 | 3 | Person 8 | 2 |
| Person 3 | 4 | Person 6 | 2 | Person 9 | 1 |

Lesson 5

Using the dot plot from Lesson 4, answer the questions below.

- Which number of pets was the most popular?

Answer: _____ **2**

- How many people were asked about the number of pets they had?

Answer: _____ **9**

Lesson 3

Examine the table below. What is the frequency that blue is repeated?

| Favorite Colors | | | |
|-----------------|------|-------|-------|
| blue | red | green | black |
| blue | red | blue | red |
| black | blue | green | blue |

Answer: _____ **5**

Problem of the Day

Lesson 6

Examine the pictograph below. How many people determined that their favorite color was blue or yellow?

Each  = 2 votes

Answer: 24

Lesson 7

Using the pictograph from Lesson 6, how many people voted for their favorite color?

Answer: 36

Lesson 8

Examine the bar graph below. Which flavor is the most popular?

Answer: Chocolate

Lesson 9

Using the bar graph from Lesson 8, answer the questions below.

- Which flavor was the least popular? How many people voted for it?

Answer: vanilla 12

- How many people voted for their favorite flavor?

Answer: 54

Lesson 10

Examine the table below.

| Randy's Extra Job Choices | |
|---------------------------|---------------|
| Tutoring | \$20 per hour |
| Mowing Lawns | \$25 per hour |
| Dog Walking | \$10 per hour |
| Raking Leaves | \$15 per hour |

If Randy decides to tutor for 5 hours and walk dogs for 6 hours, how much income will he earn?

Answer: \$160

Problem of the Day

Lesson 11

Josh runs a local bakery that sells all types of bread. For over a week, the banana nut bread has sold out. What should Josh do about the price of the bread?

- A. Leave the price the same.
- B. Increase the price.**
- C. Decrease the price.

Lesson 12

Nolan wants to buy a new pair of ski boots for on credit for 8 payments of \$42. How much will Nolan pay for the ski boots if he buys them on credit?

Answer: _____ **\$336**

Lesson 13

Grace went to the store to buy a new watch that costs \$220. If she decides to buy the watch on credit for 6 payments of \$38, how much interest will Grace pay?

Answer: _____ **\$8**

Lesson 14

Describe the difference between planned and unplanned spending. Give an example of each.

Sample answer: Planned spending is when you save up to buy something. For example, I saved my money to buy a new basketball. Unplanned spending is when you buy something you did not intend to buy. Last week I bought a bar of chocolate at the grocery store on my way out. It was not on my grocery list.

Lesson 15

Chelsea needs to buy a new backpack for school. If she works to save money from her tutoring job, would the purchase of the backpack be planned spending or unplanned spending? Explain.

Sample answer: The backpack would be planned spending because she is saving her money to buy it.

Problem of the Day

Lesson 16

Ethan wants to save \$500 for a new gaming system. If he saves \$95 a month, how many months will it take until he can buy the system?

Answer: 6 months

Lesson 17

Abby is saving money for a racing bike. If she saves \$75 a month for the next 8 months, how much money will she save?

Answer: \$600

Lesson 18

Brett earned \$95 washing cars. If he buys a new pair of shoes for \$45 and a cap for \$15, how much money will Brett have remaining?

Answer: \$35

Lesson 19

Tasha made \$100 babysitting over the weekend. What are some decisions that Tasha needs to make regarding the money she earned? Does she have options about what to do with the money? Explain.

Sample answer: Tasha needs to
decide if she should save her
money or spend it. She could put
her money into a savings account
at a bank instead of spending it.

Lesson 20

Tom's Trendy Footwear store has an overstock on sandals. What should the store do to the price of the sandals in order to make room for the new shoes that will come in? Explain your answer.

Sample answer: They should
decrease the price on the
overstock sandals.

Pre-Assessment

Read each problem below and solve.

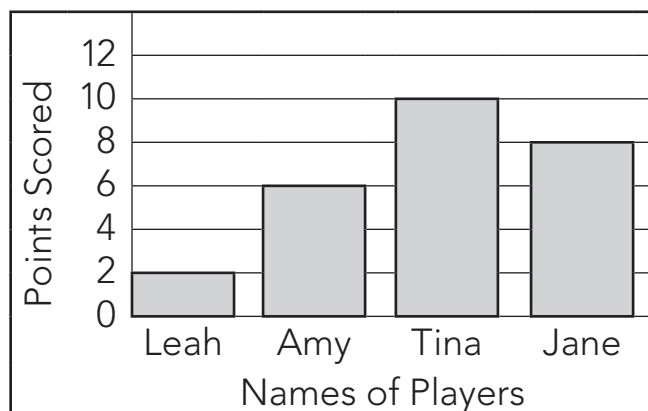

Examine the graph below. Use the graph to answer numbers 1–2.

1. Look at the graph. How many points did Amy and Jane score in all?

Answer: 14 points

2. How many more points did Tina score than Leah?

Answer: 8 points

3. A job that requires more special training and knowledge is more likely to
- A. pay a lower wage
 - B. pay a smaller salary
 - C. pay a higher wage**
 - D. require less schooling
4. Jordan decides to wash cars over the summer. If he washes 10 cars a week for \$7 each, how much money will Jordan earn in 6 weeks?
- A. \$70
 - B. \$320
 - C. \$420**
 - D. \$60
5. Patty bought a phone on credit. The phone costs \$350. Patty paid for the phone in 7 payments of \$50, plus \$3 in interest on each payment. How much money did Patty pay in interest?
- A. \$18
 - B. \$21**
 - C. \$368
 - D. \$53

Frequency Table

Answers will vary.

Information collected is called **data**.

A frequency table **shows** data collected by rewriting it using **columns** and **rows**.

| Favorite Pet | | |
|--------------|------|------|
| cat | dog | bird |
| fish | cat | bird |
| dog | fish | cat |
| cat | cat | bird |
| bird | cat | dog |

| Favorite Pet | | |
|--------------|---------------|----------|
| Kind of Pet | Tally | Number |
| cat | | 6 |
| fish | | 2 |
| dog | | 3 |
| bird | | 4 |

- Complete the frequency table.
- How many people answered the pet survey?

Answer: **15**

- Which pet was chosen the most often and least often?

most: **cat**

least: **fish**

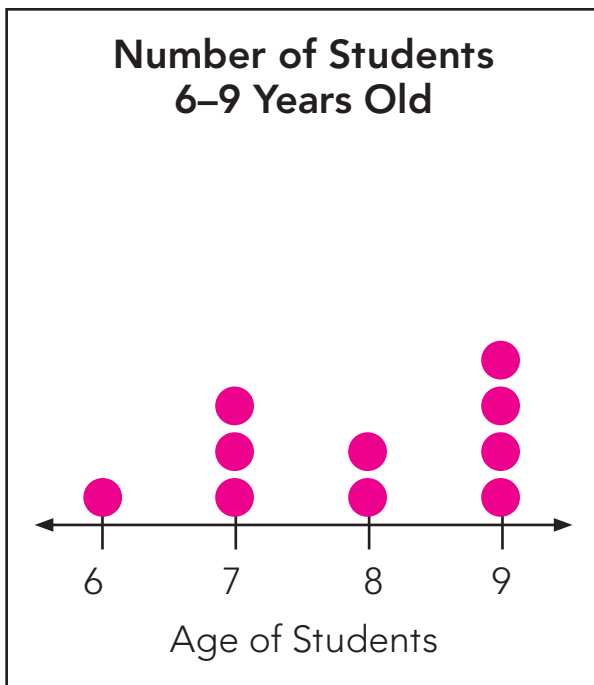

Dot Plot

Answers will vary.

A dot plot is a way to organize data

on a number line.

| Number of Students 6–9 Years Old | | | |
|----------------------------------|-----|---------|-----|
| student | age | student | age |
| #1 | 7 | #6 | 7 |
| #2 | 8 | #7 | 9 |
| #3 | 9 | #8 | 8 |
| #4 | 6 | #9 | 7 |
| #5 | 9 | #10 | 9 |

1. Use the table above to create a dot plot.
2. How many dots are shown for the age of 8?

Answer: 2

3. Which age had the most dots? Which age had the fewest dots?

most: 9

fewest: 6

Pictograph

Answers will vary.

A pictograph uses _____ **pictures** _____ or _____ **drawings** _____ to display data.

Mrs. Smith's class conducted a survey on the students' favorite type of music. Below are the results from the survey on a pictograph. Examine the pictograph and answer the questions below.

| Favorite Music Genre | |
|----------------------|--|
| Country |       |
| Pop |     |
| Classical |   |
| Rock |     |

Each  = 2 votes Each  = 1 vote

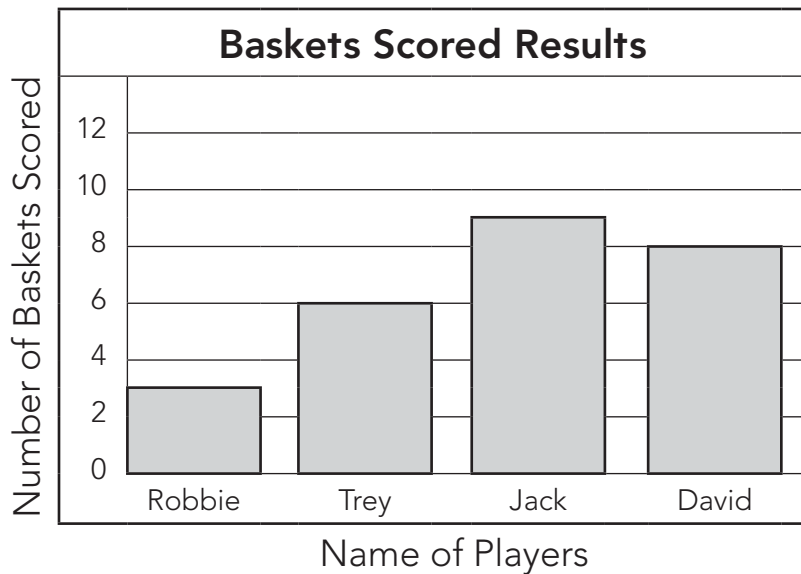

- Analyze the pictograph and determine the number represented in each category.
- How many people voted for rock music in the survey? Answer: 8
- Which music genre was the most popular? Answer: country
How many people voted for that genre? Answer: 12 people
- Which music genre was the least popular? Answer: classical
How many people voted for that genre? Answer: 3

Bar Graph

Answers will vary.

A bar graph is used to organize and display data.

Robbie, Trey, Jack, and David made a bar graph to compare the number of baskets they scored in their basketball season. Use the graph below to analyze the data and answer questions.

1. Analyze the bar graph and determine the number represented in each category.
2. How many points did Jack score?

Answer: 9 points

3. How many more points did David score than Robbie?

Answer: 5 points

Graphing Word Problems

1. Ice Cream Galore made the table below to show how many people ordered scoops of ice cream. Complete the dot plot to reflect the data.

| Number of Scoops Ordered | | | | | |
|--------------------------|-------------|--------|-------------|--------|-------------|
| person | # of scoops | person | # of scoops | person | # of scoops |
| #1 | 3 | #4 | 1 | #7 | 3 |
| #2 | 2 | #5 | 2 | #8 | 1 |
| #3 | 1 | #6 | 2 | #9 | 2 |

2. The graphs below show the weights of two babies in two different months. What information is missing?

- A. The date
B. The numbers
 C. The months
 D. The names

Examine the bar graph below and answer questions 3–4.

3. Which color was the most popular?
 How many people selected that color?
red **9 people**
4. How many more people selected red than green?
3 people

Examine the pictograph below and answer questions 5–6.

| Number of Bears Purchased | |
|---------------------------|---|
| Monday |     |
| Tuesday |    |
| Wednesday |   |
| Thursday | |

Each  = 4 bears

5. The graph should show that the Bear Workshop sold 48 bears Monday through Thursday. How many bears need to be added to Thursday to show 48 bears sold?
3 bears
6. How many more bears were sold on Monday than Wednesday?
4 bears

Data and Graphing Quiz

1. Examine the frequency table below and complete the dot plot.

| Mandy's Vocabulary Scores | | | | | |
|---------------------------|-------|--------|-------|--------|-------|
| Quiz # | Score | Quiz # | Score | Quiz # | Score |
| #1 | 90 | #6 | 80 | #11 | 90 |
| #2 | 80 | #7 | 85 | #12 | 100 |
| #3 | 70 | #8 | 100 | #13 | 80 |
| #4 | 100 | #9 | 90 | #14 | 85 |
| #5 | 100 | #10 | 75 | #15 | 75 |

2. How many scores were between 85 and 95?
 3. Which two scores were on the most tests?
 4. Which two scores were on the fewest tests?

3

100, 90, 80

70, 85

Answers will vary based on how students interpret the numbers on the graph. Examine the bar graphs below and answer the questions.

5. How many boys are in Mrs. Adam's class?
 6. How many more girls does Mrs. White have than Mrs. Adams?
 7. How many students are in both classes?

13 boys

2 girls

44 students

Examine the pictograph and answer the questions.

| Ice Cream Cones Sold | |
|----------------------|--|
| May | |
| June | |
| July | |
| August | |

Each = 3 cones

8. How many cones were sold in June?
 9. How many more ice cream cones were sold in May than in August?
 10. What was the total number of ice cream cones sold in June, July, and August?

15 cones

6 cones

51 cones

Answers will vary.

Income

The amount of money _____ **organize** _____ for doing _____ **organize** _____.

| | |
|--------------|---|
| Labor | Mental and or physical effort put in to complete work |
| | Examples: Mowing lawns, raking leaves, moving boxes |

| | |
|----------------------|---|
| Human Capital | Skills, knowledge, or experience needed by a person to work |
| | Examples: customer service, accountant, teacher |

1. Examine the table below to see how Jodie makes her income. If Jodie teaches 9 piano lessons a week and tutors 7 times in a week, how much money would she earn?

| Jodie's Sources of Income | |
|----------------------------------|------|
| Piano Lesson | \$30 |
| Tutoring Session | \$25 |

Jodie will earn \$445.

2. What kind of skills would Jodie need to be a tutor and teach piano lessons? Brainstorm and write your list below.

Sample answers:**Good at school****Patient****Know how to play the piano**

Scarcity

How does scarcity impact the cost of items?

When there is a **shortage** _____

of **goods the price can increase.** _____

| | |
|-------------|--|
| EXAMPLE ONE | <p>Monty's Market sells apples. The farm that supplies their apples suffered a huge drought and only a few barrels of apples were produced. What will happen to the price of the apples? Analyze the situation and explain.</p> <p>Sample answer: The price of apples will increase because there were not as many apples due to the drought.</p> |
|-------------|--|

| | |
|-------------|---|
| EXAMPLE TWO | <p>Gina's hair salon sells "All Natural Blonde Shampoo." The product did not become popular and did not sell well. The hair salon has lots of extra bottles. What will happen to the price of the shampoo? Analyze the situation and explain.</p> <p>Sample answer: The price of the shampoo will decrease because the salon will need to get rid of it to make room for new products.</p> |
|-------------|---|

Credit

What does it mean to pay with credit?

Answers will vary.

When something is **too expensive**

but **you pay** _____

for **it later** _____

_____.

8 payments of \$55

EXAMPLE ONE

Sally wants to buy a bike. Examine the tag on the bike. She does not have all the money to buy it. How much more money will Sally spend buying the bike on credit instead of paying for the bike with cash up front?

\$440

EXAMPLE TWO

Veronica needs to buy new tires for her car. She can pay \$150 up front for all the tires or use credit and pay 9 payments of \$20. How much more money will Veronica spend on the tires if she buys them on credit?

\$30

Interest

How does a person build up interest?

Answers will vary.

Additional money that is **paid** _____ when
money is **overdue** _____
or **late** _____.

4 payments of \$70

EXAMPLE ONE

Mike wants to buy a new camera. The camera costs \$250 up front with cash or Mike could pay on credit for 4 payments of \$70. If Mike chooses to pay on credit, how much interest will he pay on the camera?

\$30

EXAMPLE TWO

Madison buys a new pair of silver earrings. The earrings originally cost \$115, but Madison buys the earrings with credit. If Madison pays \$25 a month for 5 months, how much interest is Madison paying?

\$10

Planned vs. Unplanned Spending

| | |
|--------------------|---|
| PLANNED SPENDING | <p>Paying money that is expected toward a good or service; expense planned ahead of time.</p> <p>Examples:</p> <p>Sample answers:</p> <ul style="list-style-type: none"> • Paying for a dentist visit • Saving for college |
| UNPLANNED SPENDING | <p>Paying money that is not expected toward a good or service; an expense not planned in advance.</p> <p>Examples:</p> <p>Sample answers:</p> <ul style="list-style-type: none"> • Buying candy at the checkout line • Paying for medicine |

| | |
|-------------|---|
| EXAMPLE ONE | <p>Kerri saved her money for two months to buy a new laptop. When Kerri went to the store to buy her laptop, she paid in cash and did not have to use credit. Would this be an example of planned or unplanned spending? Explain.</p> <p>Answer: _____ planned _____</p> |
|-------------|---|

| | |
|-------------|---|
| EXAMPLE TWO | <p>Marcus was driving one day when he got a flat tire. The tire could not be repaired and had to be replaced. Is this an example of planned or unplanned spending? Explain.</p> <p>Answer: _____ unplanned _____</p> |
|-------------|---|

Answers will vary.

Savings Plan

What kind of plan can I make to save money?

_____ **Saving** _____ money is
_____ **setting** _____ money
aside to spend in the _____ **future** _____.

EXAMPLE ONE

Kenna wants to buy a new phone that costs \$250. If Kenna saves \$50 a month, how many months will it take Kenna to save enough? Complete the table below to solve.

| Month | 1 | 2 | 3 | 4 | 5 |
|-------------|------|--------------|--------------|--------------|--------------|
| Total Saved | \$50 | \$100 | \$150 | \$200 | \$250 |

Answer: _____ **5 months** _____

EXAMPLE TWO

Tayden wants to start saving for college. If he saves \$25 a month for a year, how much money will he save? Draw a table to show your work.

Answer: _____ **\$300** _____

Answers will vary.

Income Decisions

How do I decide what to do with my income?

_____ **Income** _____ is the
amount of money _____ **earned** _____.

AFTER BILLS, WHAT CAN BE DONE WITH THE REMAINING INCOME?

| Spending | Saving | Charity |
|----------|--------|---------|
| | | |

EXAMPLE ONE

Katie earned \$80 babysitting. She pays her parents the \$30 she owes them and buys a new watch for \$25. How much money does Katie have left over? What can she do with the remaining money?

Katie will have \$25 left over. She can save that money or spend it.

EXAMPLE TWO

Jacob wants to earn money to buy a new game and to donate to charity. Jacob's new game costs \$50 and he wants to donate at least \$75 to charity. If Jacob rakes leaves for \$30 a lawn, how many lawns does he have to rake to earn enough money to buy his game and donate to charity?

5 months

Personal Finance Quiz

Use the word bank to fill in the statements below. Each word can be used only one time.

| | | | |
|------------------|---------|----------|----------|
| Word Bank | income | credit | scarcity |
| | expense | interest | labor |

- interest is when a person pays more money because money was borrowed or loaned.
- A person pays with credit when they purchase an item, but pay for it later.
- The amount of money someone pays for a good or service is called an expense.
- The service a person provides to earn an income is called labor.
- The amount of money a person makes is called their income.
- scarcity is when there is a shortage of supplies.

Read each problem below and solve.

- Jared wanted to buy a bike that costs \$300. When he went to the store, he found out it was on sale for \$250. Jared bought the bike on credit and will pay 8 payments of \$33. How much interest will Jared pay on the bike? Solve and record your answer below.
- Leanne works as a lifeguard at the neighborhood pool. She earns \$55 a day. If she works 6 days in a row, how much money will she earn? Solve and record your answer below.

\$264, or \$14 in interest

\$330

- Bailey's Bakery is open for breakfast every day. They always sell out of their cinnamon chocolate muffins. If the muffins are in such high demand, what should Bailey's Bakery do to the price? Write your answer below and explain why.
Sample answer: Bailey should raise the price of the muffins.
- Ronnie saved his money for a month to buy a new video game. When he arrived at the store, he saw that controllers were on sale and decided to purchase one. Was the purchase of the controller planned or unplanned spending? Explain your answer.
Sample answer: Ronnie's purchase was unplanned. He was saving for a video game but bought a controller instead

Assessment

Read each problem below and solve.

1. Jason wants to buy a new desk that costs \$180. If he saves \$22 a week, how many weeks will it take Jason to save for the desk?

Answer: 9 weeks

2. The local gift shop has an overstock of postcards. In order to sell more of the postcards, what should the gift shop do to the price of the postcards?

- A. Raise the price.
B. Keep the price the same.
C. Lower the price.

3. Claire found a desk she wants to buy for \$350 cash or 7 payments of \$53. How much interest will Claire pay on the desk if she pays with credit?

Answer: \$371, or \$21 in interest

4. What are some examples of labor? List at least 3 examples.

Sample answers: mowing lawns,
cashier, accountant

5. Explain scarcity.

Sample answer: Scarcity is when
there is a shortage of supply.

6. Trinity earns \$35 babysitting. She needs to buy a new binder for school that costs \$5 and a new lunchbox for \$20. How much money will Trinity have left?

Answer: \$10

Read each problem below and solve.

7. Pablo earns \$40 a week mowing his neighbor's lawn. If Pablo works for 9 weeks, how much money will he earn?

Answer: \$360

8. Alan saved his money for three months and went to the store to buy a new dishwasher. While he was there, he decided to buy a microwave. What kind of spending was the dishwasher?

A. unplanned

B. planned

9. Quinn found a table she wants to purchase. The table costs \$455 or she could buy on credit and pay 9 payments of \$55. If Quinn buys the table on credit, how much will it cost?

Answer: \$495

10. What does it mean to buy something on credit? Explain below.

Sample answer: Credit is when
you take something home and
pay for it later.

11. What are some decisions a person has to make after earning an income?

Sample answer: The person
needs to decide to what they are
going to do with their income.
How much do they want to spend
and how much they want to save.

12. George wants to buy a new TV. The TV costs \$299 and George can save \$24 a week. How many weeks will it take George to save for the TV?

A. 11 weeks

B. 12 weeks

C. 13 weeks

D. 14 weeks

Use the graphs below to answer questions 13–15.

| Number of Eggs Found | | | | | |
|----------------------|----------------|--------|----------------|--------|----------------|
| person | number of eggs | person | number of eggs | person | number of eggs |
| #1 | 18 | #6 | 18 | #11 | 15 |
| #2 | 20 | #7 | 18 | #12 | 16 |
| #3 | 15 | #8 | 19 | #13 | 17 |
| #4 | 16 | #9 | 20 | #14 | 16 |
| #4 | 17 | #10 | 20 | #15 | 20 |

13. Complete the dot plot next to the table.

14. How many people found 17 or more eggs?

Answer: 10 people

15. How many people found fewer than 18 eggs?

Answer: 7 people

Use the graphs below to answer questions 16–17.

16. How many more cookies did Jess sell than Marsha in April?

Answer: 30 more cookies

17. How many cookies did Jess and Marsha sell in March?

Answer: 85 cookies

Use the graph below to answer questions 18–20.

Each  = 12 books

18. How many books were purchased in April?

Answer: _____ **48 books**

19. How many more books were purchased in January and February than in March?

Answer: _____ **24 books**

20. How many books were purchased in all four months?

Answer: _____ **240 books**

Use the tables below to analyze the information and answer the questions.

| Favorite Color | | | |
|----------------|-------|-------|-------|
| blue | red | pink | green |
| blue | pink | red | blue |
| green | blue | green | red |
| red | green | green | blue |
| blue | pink | green | green |

How many people answered the survey?

20 people

Which color is least popular?

pink

| Favorite Color | | |
|----------------|-------|--------|
| Color | Tally | Number |
| blue | | 6 |
| red | | 4 |
| green | | 7 |
| pink | | 3 |

Which color is the most popular?

green

Which two colors got a combined vote of 7?

red and pink

Use the tables below to analyze the information and answer the questions.

| Favorite Subject | | | |
|------------------|---------|---------|---------|
| math | reading | science | writing |
| math | math | writing | science |
| writing | math | writing | math |

Which subject is the least popular?

reading

What is the most popular subject?

math

| Favorite Subject | | |
|------------------|-------|----------|
| Subject | Tally | Number |
| math | | 5 |
| writing | | 4 |
| reading | | 1 |
| science | | 2 |

How many people are represented in this survey?

12 people

How many more people like math than science?

3 people

Examine the table below, create a dot plot, and answer the questions.

| Number of Petals on Flowers | | | | | |
|-----------------------------|------------------|--------|------------------|--------|------------------|
| flower | number of petals | flower | number of petals | flower | number of petals |
| #1 | 5 | #4 | 6 | #7 | 6 |
| #2 | 6 | #5 | 4 | #8 | 5 |
| #3 | 7 | #6 | 5 | #9 | 6 |

How many flowers were examined?

9

What number of petals was most common?

6

Which petal number was least common?

4 and 7

Which two petal numbers had the highest count?

5 and 6

Examine the table below, create a dot plot, and answer the questions.

| Number of Cube Tosses | | | | | |
|-----------------------|---------------|------|---------------|------|---------------|
| toss | number rolled | toss | number rolled | toss | number rolled |
| #1 | 3 | #6 | 4 | #11 | 3 |
| #2 | 3 | #7 | 3 | #12 | 4 |
| #3 | 5 | #8 | 2 | #13 | 2 |
| #4 | 5 | #8 | 6 | #14 | 2 |
| #5 | 3 | #10 | 5 | #15 | 5 |

What number was rolled the least?

6

How many times was the cube tossed?

15

What number was rolled the most?

3

Which two numbers were rolled the same number of times?

none

Examine the pictograph and answer the questions that follow.

Each  = 2 votes

How many people were surveyed?

36 people

What crayon color was most popular?
How many people selected that color?

blue, 12 people

What crayon color was least popular?
How many people selected that color?

red, 6 people

Which two crayon colors got a total of 22 votes combined?

blue

yellow

Examine the pictograph and answer the questions that follow.

Each  = 2 votes Each  = 1 vote

How many people were asked about their favorite meal?

34 people

Which meal was least popular?
How many people chose that meal?

dinner, 3 people

Which meal was most popular? How many people chose that meal?

lunch, 15 people

Which two meals got a total of 21 votes combined?

lunch

dinner

Examine the bar graph and answer the questions that follow.

How many people were asked about the item they chose?

52 people

How many more people selected pasta than salad?

5 people

Which food was the most popular?
How many people selected that food?

steak, 18 people

How many more people selected steak than fish?

7 people

Which food was the least popular?
How many people selected that food?

salad, 9 people

Examine the bar graph and answer the questions that follow.

How many people were asked about the item they chose?

52 people

How many more people selected pasta than salad?

5 people

Which food was the most popular?
How many people selected that food?

steak, 18 people

How many more people selected steak than fish?

7 people

Which food was the least popular?
How many people selected that food?

salad, 9 people

Review Graphs & Data

Read each task card and record your answers below.

1. How many more students have dogs than fish as pets?

6 students

2. How many more students have cats and dogs than birds and fish?

13 students

3. Complete the dot plot below.

4. How many students scored between 90 and 100?

9 students

5. Examine the frequency table and complete the tally table below.

| Student Elective Data | | | |
|------------------------|---------------|-------|--------|
| athletics | band | choir | debate |
| | | | |

6. How many students chose athletics and band over choir?

20 students

7. How much more money did Daniel make than Gavin?

\$15

8. How much money did the four boys make altogether?

\$120

Marty works for 20 hours every week at the local bookstore. If she makes \$9 an hour, how much will Marty make in three weeks?

A. \$180

B. \$270

C. \$360

D. \$540

To become an animal scientist, which type of experience would not be beneficial?

A. experience working at a zoo

B. working at an animal hospital

C. experience working at an animal toy store

D. interning at a vet's office
