WEIGHTS AND MEASURES ARE APPROXIMATIONS AND MAY VARY DUE TO THE MANUFACTURING PROCESS.

Pursuant to the state of California requirements, our materials and coatings cannot present an acute or chronic hazard to users from any available toxic substance, without proper labeling and warning. Despite these substances being present in very low amounts, actually measured in parts per million, the labels and warnings need to be present on the item and/or packaging. These products are safe and are generally regarded as suitable for their intended purpose. Many of our items will contain these warning labels out of an abundance of caution, to help placate larger retailers who request the warning labels. If you would like to further research the topic of Proposition 65 warnings, please visit: <https://www.p65warnings.ca.gov>. As always we stand by our products and assure that they will not cause our customers harm, as long as they are used with all stated safety and proper use precautions.
