

THE BATTERY

1. The battery is the source of electrical energy for the system.

2. It provides the power to start the engine and to run the electrical system when the engine is not running.

3. The battery is charged by the alternator when the engine is running.

4. The battery is a storage device for electrical energy.

5. The battery is a source of electrical energy for the system.

6. The battery is a storage device for electrical energy.

7. The battery is a source of electrical energy for the system.

8. The battery is a storage device for electrical energy.

9. The battery is a source of electrical energy for the system.

10. The battery is a storage device for electrical energy.

11. The battery is a source of electrical energy for the system.

12. The battery is a storage device for electrical energy.

13. The battery is a source of electrical energy for the system.

14. The battery is a storage device for electrical energy.

15. The battery is a source of electrical energy for the system.

16. The battery is a storage device for electrical energy.

17. The battery is a source of electrical energy for the system.

18. The battery is a storage device for electrical energy.

19. The battery is a source of electrical energy for the system.

20. The battery is a storage device for electrical energy.

21. The battery is a source of electrical energy for the system.

22. The battery is a storage device for electrical energy.

23. The battery is a source of electrical energy for the system.

24. The battery is a storage device for electrical energy.

25. The battery is a source of electrical energy for the system.

26. The battery is a storage device for electrical energy.

27. The battery is a source of electrical energy for the system.

28. The battery is a storage device for electrical energy.

29. The battery is a source of electrical energy for the system.

30. The battery is a storage device for electrical energy.

IGNITION

Component	Function
Battery	Provides electrical energy to the system.
Coil	Increases the voltage of the electrical energy.
Distributor	Distributes the electrical energy to the spark plugs.
Spark Plugs	Ignites the fuel-air mixture in the combustion chamber.

The ignition system is responsible for providing the spark that ignites the fuel-air mixture in the combustion chamber. It consists of several components, including the battery, coil, distributor, and spark plugs.

The battery provides the electrical energy to the system. The coil increases the voltage of the electrical energy. The distributor distributes the electrical energy to the spark plugs. The spark plugs ignite the fuel-air mixture in the combustion chamber.
