

EXTENSION

Extend the length of the structure by adding more sections.

Use the same materials and techniques to build the extension. Make sure the extension is level and square with the existing structure.

REQUIREMENTS:

Materials:

Steps:

1. Measure the length of the extension.
2. Cut the materials to the required lengths.
3. Assemble the extension using the same techniques as the main structure.
4. Attach the extension to the main structure, ensuring it is level and square.

REQUIREMENTS:
