$3M^{\scriptscriptstyle\rm TM}$  Adhesives, Tapes, and Reclosable Fasteners for Sign Mounting

# for repositionable, temporary, and permanent mounting EMPLOYEES ONLY

1

cessories

## **Repositionable and Temporary Mounting**

#### 3M<sup>™</sup> Reclosable Fasteners

3M<sup>™</sup> Scotchmate<sup>™</sup> Reclosable Fasteners – For thousands of easy attachments and removals, these hook and loop fasteners keep replaceable graphics smooth and secure.

Hook and loop of  $3M^{*}$  Scotchmate<sup>\*\*</sup> Reclosable Fasteners mesh to hold flexible graphics to a decorative laminate surface.

3M<sup>™</sup> Dual Lock<sup>™</sup> Reclosable Fasteners – For hundreds of secure attachments, interlocking mushroom-capped stems snap together to help keep large or heavy replaceable graphics in place.

**Pressure sensitive adhesive backing** on both types of fasteners bonds on contact and holds the mating strips to metal, plastic, glass, wood, and other surfaces.

Mushroom-capped stems of  $3M^{\bowtie}$  Dual Lock<sup> $\bowtie$ </sup> Reclosable Fasteners snap together to hold the sign face in a kiosk with 5xmore holding power than  $3M^{\bowtie}$  Scotchmate<sup> $\bowtie$ </sup> Reclosable Fasteners.

#### 3M<sup>™</sup> Removable/ Repositionable Tapes

These double-coated tapes feature a "permanent" adhesive on one side of a carrier and a removable/repositionable adhesive on the other. The permanent side adheres to a graphic. Removable side is covered with a liner that is removed to expose the adhesive for attaching a temporary sign.

With the permanent side of the adhesive on the sign, the removable side of the adhesive bonds to glass, plastics, painted surfaces, metal, foam board, and other display surfaces.

## Permanent Mounting

#### 3M<sup>™</sup> Laminating Adhesives

Laminated to the back of paper, vinyl, plastic film, and other sign materials, these pressure sensitive adhesives bond permanently to foam board, plastic, and other surfaces.

Select formulations to meet end use conditions that include sunlight, extreme temperatures, long term display, moisture, and more.

ANNUAS ANNUAS SALE Sale

Full adhesive coverage of wide web graphic for lamination – no matter what your application, rely on 3M for the right solution. Laminate in-store high impact graphics to foam board.

#### 3M<sup>™</sup> VHB<sup>™</sup> Tapes

These double-coated foam tapes have been used to build professional looking signs for over 25 years.

- High strength for durable indoor and outdoor applications
- Easy application without drilling, screwing, riveting, or welding
- Instant handling strength compared to liquid adhesives
- Invisible fastening for smooth attractive surfaces

Conformable 3M<sup>™</sup> VHB<sup>™</sup> Tape (below) fills gaps between sign and rough surface for tight, reliable attachment.

### Scotch<sup>®</sup> ATG Adhesive System

With the squeeze of a trigger, the Scotch® ATG 700 Applicator applies doublecoated adhesive tape to paper, foam board, vinyl and other sign materials.

The liner rewinds during application to save time and eliminate mess.

Select repositionable/removable or permanent adhesives.
