

BRAYDEN PULSE

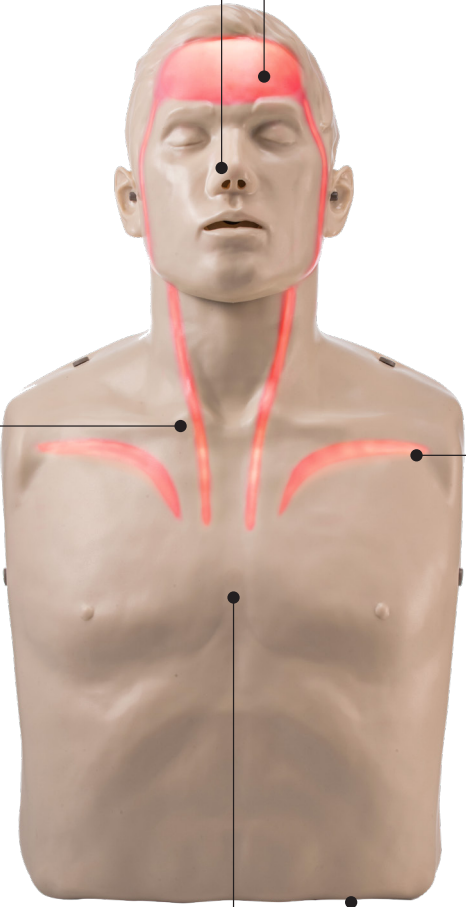

Airflow

Oral and nasal passages which allow realistic nose pinch

Perfusion

Brain will illuminate when the depth, rate and recoil of compressions are correct. (ANZCOR)

Rate

Lights will indicate blood flow when the rate of compressions is between 100-120 beats per minute.

Depth

Will fully illuminate once the depth of compressions is over 5cm

Chest Rise

Anatomically correct chest that rises and falls realistically during ventilations

Power Options

Runs on battery or mains power.
