

Stop Thieves In Their Tracks!

Scavengers are everywhere. ToyLok's tamper-resistant design keeps your gear safe while you're away. Simply loop the anti-abrasion cable through your motorcycle, ATV, generator or furniture. Lock the cable back into the ToyLok device and you're ready to hit the trails, head to the beach, or go to the fishing pond. Thanks to ToyLok, your belongings will be there when you get back.

Loop it, lock it, leave it!

Compact, Nylon Design

The internal pulley and braking system of the model 337120 ToyLok allows you to choose your optimum length of cable. The dent and scratch resistant nylon case and 15-feet of coated cable reduce abrasion and rub marks on your gear. Lock the cable end to the metal tab or back to the cable for maximum usable length. When you're ready to use your gear, simply remove the padlock and give the cable a tug to retract. The built-in clutch prevents cable snap back. Finely braided steel cable makes it extremely difficult for bolt-cutters to work. Breakaway security nuts provide a secure installation.

Quick Facts

- Easy, bolt-on installation
- Built-in clutch prevents cable snap while retracting
- 15 feet of PVC coated, anti-abrasion cable
- Internal braking and pulley system allows users to choose their optimum length of cable
- 8,000 pound rated cables ensures your gear stays safe
