

THE BUCKLE UP

FOR THE ROAD

At the time of the crash, the car was traveling at approximately 60 miles per hour. The driver, who was not wearing a seat belt, was thrown from the vehicle and landed on the roof of the car. The car rolled over twice before coming to a stop.

The driver sustained serious injuries, including a broken neck and a skull fracture. The driver was transported to a nearby hospital, where he was pronounced dead.

The driver's failure to wear a seat belt was the primary cause of the fatal crash. Had the driver been wearing a seat belt, the car would have stopped on the road, and the driver would have remained seated.

SEAT BELT SAFETY

Do's	Don'ts
Always wear your seat belt.	Don't drink and drive.
Always use your seat belt correctly.	Don't use your phone while driving.
Always buckle up before moving the vehicle.	Don't wear your seat belt while drinking alcohol.
Always wear your seat belt, even when you're driving alone.	Don't wear your seat belt while driving under the influence of drugs.

SAFETY IS ALWAYS THE BEST OPTION.
