Better Built. Better Equipment.

HILLYARD

The Cleaning Resource®

Better Built. Better Equipment.

Our Trident Brand of equipment starts from the ground up - at a place where intelligent design intersects with innovative technology and exceptional engineering to deliver superior cleaning equipment. Cleaning equipment that lowers your total cost of ownership, reduces your cost to clean and improves cleaning results. It's what you expect out of your equipment investment, and it's what we deliver. We're Hillyard, The Cleaning Resource, since 1907.

Carpet and Rug Institute Approved

CRI has developed the carpet industry's only scientific program to test and measure the effectiveness of cleaning products and equipment. The results help consumers make informed decisions and manufacturers improve their products. So, carpets are cleaner, healthier and last longer. Everyone benefits. Trident EX Series extractors and V Series upright vacuums carry the CRI Seal of Approval.

Encapsulation Cleaning with Deep Action

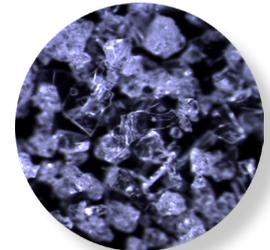

Use Hillyard Deep Action® with an encapsulation carpet cleaner as a low moisture carpet cleaning process that removes soil while improving the overall carpet appearance; carpet dries in about 20 minutes while reducing water and detergent consumption.

- Two counter-rotating brushes to effectively clean and agitate both sides of the carpet nap.
- Counter-rotating brushes lift and groom the carpet pile, while the debris bin catches soil and debris.
- Built-in on-board spraying system for increased productivity.

Hillyard Crystalline Encapsulation

Deep Action®, formulated as a multi-dimensional surfactant, acrylic polymer blend, magnified 51 times under a microscope, encapsulates soil and dries as clear crystals.

Interim Cleaning Process

1. Pre-Spray With Hillyard Deep Action
2. Agitate Carpet with the ICS17
3. Allow Carpet to Dry to Touch, Vacuum

Restorative Extraction Processes

1 Pre-Spray Method More Dwell Time, Better Results

1. Pre-treat with Hillyard Carpet Pre-Spray
2. Extract with Hillyard Extraction pH Rinse or Carpet pH Rinse

2 "In-The-Tank" Method Faster Process, Good Results

- Extract with Hillyard HD Extraction

When the "In-The-Tank" method is used, extraction chemical is applied to the carpet and then it is immediately extracted out without any dwell time. You will get good results, however, the pre-spray method will yield even better results.

MS2 Mini-Spotter

Portable and lightweight, the MS2 is the convenient and easy-to-use option for spot removal.

- Quickly remove spots in carpet and upholstery.
- Lightweight and portable design makes extraction easy.
- Translucent recovery tank makes it easy to see recovery water level.
- Two-gallon capacity delivers easy cleaning of carpet spots/stains.
- Clear hand tool shows cleaning results.
- 1.16 hp vacuum motor and 55 psi pump provide more cleaning and drying power.
