Certificate of Acceptability

Dear CRC® Valued Customer:

In 1998, the USDA Food Safety Inspection Service discontinued the testing of new and reformulated proprietary substances and nonfood compounds intended for use in USDA inspected food-processing facilities. In December of 1999, the National Sanitation Foundation (NSF), a non-profit, third party product certifier specializing in public health and safety, revived the USDA authorization program with the launch of their own Registration and Listing Program for Proprietary Substances and Non-Food Compounds. The NSF program is fee based and mirrors the previous USDA program evaluation for all product categories. Once a product has successfully gone through the NSF approval process, it receives a registration number. This registration number is listed on the label of the NSF registered product, along with the registration mark and category code.

CRC products authorized by the USDA before 1998 continue to meet USDA 1998 guidelines. Products introduced or modified after January 1999 are submitted to the NSF authorization process and carry the new NSF registration upon approval.

The following product is acceptable for use as a coating where there is no possibility of food contact (R2) such as floors, walls, and ceilings. The coating must be applied in a manner which prevents direct or indirect contamination of edible products. Before the food product may be placed in the area where the material is being used, the area should be sufficiently free of odor to prevent product contamination. As a safety precaution, smooth coatings should not be applied to walking or standing surfaces in processing areas.

Steel Re-Nu®
No. 18211 (Item# 1005234)
Category Code R2
NSF Registration No. 150841
