

HIGH COUNTRY SERIES

NZ5000 | NZ8000 | Wood fireplaces

Napoleon's High Country™ series wood-burning fireplaces combine the impact of European-inspired clean-face design with the traditional comfort of a wood fire. These fireplaces have been designed for extremely fast start-ups and direct smoke up and to the back of the firebox for a clean-burning experience. The counterbalanced, ZERO GRAVITY™ screen and door operate independently with ease, making lighting and loading effortless. When not in use, the flue and outside air damper close completely to minimize heat loss. Bask in the glow of a wood fire that adds warmth, impact, and luxury to your favorite space.

Features

- Airwash system keeps the glass clean to ensure a clear view of the fire at all times
- Outside air control handle allows you to easily adjust the burn rate for optimal heat output and efficiency
- Refractory brick lined to increase durability and heat retention
- Warranty: President's Limited Lifetime
- Holds up to 30lbs of wood (5000), 50lbs of wood (8000),
- Available sizes (width): 42" (5000), 60" (8000)

Innovations

ZERO GRAVITY door system:

The ZERO GRAVITY Door System, unique to Napoleon's High Country[®] series, features a counterbalanced door and screen for effortless operation—so light that everyone can use it. The screen and heat-radiating ceramic glass door can be lifted together or independently, and provide an unobstructed view of the fire. The counterbalanced glass door and screen slide up into the wall using a four-way roller system, allowing anyone to masterfully build a fire or add logs quickly and effortlessly. This innovative technology eliminates shutters, handles, and doors, offering a clear and expansive view of the fire.
