

Simple. Scalable. Flexible. Wireless Lighting Controls.

Easy to use scene selection switches for commercial spaces.

Daintree® WWD2-4 Commercial Scene Switch

WWD2-4 allow easy-to-use controls to select lighting scenes based on the types of tasks being performed in the space. Lighting can be commissioned with pre-determined light levels to provide quick lighting control adjustments. The screwless wall plate and decorator design enhances the aesthetic of the architectural design of the space.

Works on Daintree EZ Connect or Daintree Networked platforms

Decorator style and screwless wall plate design for a modern appearance

Mounts in-wall or surface mount options

White indicator light for added visibility

Intuitive & tactile button response for users

Multi-way operation (up to 4 switches)

Face Plates are available in blank, with light icons, scene numbers or can be custom printed

Can be used as a two-zone dimmer switch or a 4-button scene switch

Daintree® Wireless Controls are *Simple, Scalable* and *Flexible*

Easy-to-use user interface

Flexible wireless mounting options

Scalable commissioning in **Daintree EZ Connect** and **upgradable** to **Daintree Networked**

Easy scene selection

Multi-way operation

Ideal in **new** or **retrofit** projects

Daintree Wireless lighting controls provide a highly scalable solution to address evolving environmental regulations and transform spaces into intelligent environments for buildings of all sizes. The WWD2-4 lighting scene switch provides intuitive lighting controls to any space. Designers and contractors can pre-determine light levels in a room to provide end users quick adjustments for common tasks, like full-brightness, presentation mode, theatre mode or banquet mode. Users can use the scene switch to adjust light levels based on the task being performed.

The devices provide a clean and modern design that compliment any commercial application. The devices are available in two designs for surface mounting, or in-wall, which allows easy retrofit and ganging in junction box mounting. The multi-way functionality allows up to 4 devices to control the room or space for even greater flexibility and control. Buttons can be custom labeled for improved end user experience.

WWD2-4 are battery powered wireless devices that are easy to install and commission on either the **Daintree EZ Connect** app-based room control platform, or can be upgraded to the full-featured **Daintree Networked** for whole building or multi-site scheduling, reporting, monitoring and troubleshooting.
