

MSA Portable Instrument Competency Training

A safe work environment just doesn't happen, it is created!

MSA training courses aid in safe work environment maintenance and compliance with OSHA and other government safety regulations by training competent users of required gas detection instruments. These training courses highlight the importance of proper use and maintenance of gas detection instruments, enhancing your safety program and saving you money in the process.

Each course discusses advantages and disadvantages of the sensor technology employed. Instrument setup, operation, gas checks, and calibration are demonstrated with hands-on diagnosis, troubleshooting, disassembly, and repair. Additionally, gas sampling techniques are discussed with real-life examples.

This **competency certification course** allows students to leave class with all training materials, tools, and certificate of instruction.

Course benefits include:

- ☐ Creates competent users through hands-on instruction as to the proper use and maintenance of portable gas detection monitors.
- ☐ Competent users improve workplace safety and aid in compliance with OSHA and other government safety regulations.
- ☐ Competent users reduce costs by performing complete instrument setup, including gas checks and calibration.
- ☐ Competent users improve up-time through troubleshooting, diagnosis, disassembly, and repair capabilities.

Price in USD*	Training Description	Part Number	Duration
\$300.00	ALTAIR® 4 & 4X Multigas Detector Training	ZT-ALTAIR4	3 hours
	ALTAIR 5X Multigas Detector Training	ZT-ALTAIR5	3 hours
	ALTAIR & ALTAIR Pro Gas Detector Training	ZT-ALTAIR1	3 hours
	Galaxy® Test System Training	ZT-GALAXY	3 hours
	Orion® Multigas Detector Training	ZT-ORION	3 hours
	Sirius® Multigas Detector Training	ZT-SIRIUS	3 hours
	Solaris® Multigas Detector Training	ZT-SOLARIS	3 hours
\$500.00	Combo 2 – any 2 courses listed above	ZT-COMBO2	5 hours
\$600.00	Combo 3 – any 3 courses listed above	ZT-COMBO3	6 hours

Prices are per person for scheduled public classes at MSA training facilities and select field locations.

Why hold MSA training classes at your facility?

Convenience and savings provide your employees with quality training while saving employee downtime and travel expenses. In addition, on-site co-worker collaboration fosters an ongoing cooperative environment to maintain workplace safety compliance.

MSA on-site training classes require:

- ☐ A minimum of 4 students (except combination courses).
- ☐ No charge for additional students or transportation expenses after the 4-student minimum is reached.
- ☐ Site fee of \$700.00 USD.
