

Product Change Notice

3M™ Tripolarized Wiremount Socket – 820 Series

Issue Number: 787

Date: April 13, 2011

Product Change

In order to facilitate manufacturing process improvements, a minor cosmetic change has been made to the 820 Series Wiremount Socket. Two small “windows” have been removed from the face of the socket. These “windows” are non-functional. This change is cosmetic only and is not expected to affect product performance. Customers should require no process changes as a result of this action.

Because we do not anticipate that the change will affect usage, no last time buy will be offered. The change is effective immediately and covers all products shown on TS-0254. The change is shown below.
