16 level indicators so you can keep track of pumping level

Pumping mode indicator so you know when you're in stimulation vs expression

Stimulation = 
Expression = 

Benefits of using Pump In Style® Pro:

- ✓ **Easy transition:** You're busy so we made the pumps similar so the consistency reduces stress and anxiety.
- ✓ **Control & Feedback:** Clear pumping levels and mode indicators give you the control to fine-tune your comfort.
- ✓ **Efficiency & Comfort:** The pumping pattern offers a quick build and optimized hold to maximize milk output while providing a gentle release to minimize discomfort.

75% of the **top 24 most reputable US academic medical centers** are Medela customers.

90% of the **10 best leading children's hospitals nationwide** are Medela customers.

THE ONLY unmatched hospital to home solution

Based on science from most studied hospital-grade breast pump and #1 in the hospital market.*

Medela now offers moms an unmatched hospital to home solution with the newly redesigned Pump In Style® Pro for continuity of care.

Hospital performance is more than just vacuum strength. There is a world of science behind the curve.

Pump In Style® Pro now shares a similar pumping pattern to Symphony's maintain mode to maximize milk output and comfort.

Making breast milk maintenance successful with personalized care and education that seamlessly transitions from hospital to home. The time you spend setting mom up on Symphony ensures she is set up for success when using her Pump In Style® Pro at home.

- ✓ **Breast Shield Sizing & Compatibility:** Proper sizing is essential. The personalized fitting you provide with Symphony using our 105° breast shield is also compatible with the Pump In Style® Pro, delivering 11.8% more milk.**
- ✓ **Maximum Comfort Vacuum (MCV):** The personalized Symphony MCV you help mom find is now similar to Pump In Style® Pro.
- ✓ **+18% More Milk:** Double pumping with the Pump In Style® Pro boosts milk output.***
- ✓ **Enhancing patient care:** By ensuring seamless continuity through similar breast pump technology and functionality, healthcare professionals can provide more effective and consistent support to mothers in their breastfeeding journey.

Disclaimer: Pending completion of design control activities.
