Refine
Mask critical detail areas with 3M™ Specialty Tapes

Finish
Achieve consistent masking results across the repair process

One System. One Workflow. Trusted Performance

The masking process may be the most overlooked step of refinishing—yet it is the most time consuming. If done properly with the correct tools and products, it can greatly reduce rework.

By choosing a complete 3M masking system designed to work together across every stage of the process, collision repair professionals can achieve efficient preparation, reliable application, and high-quality results.

Made to Fit the Way You Mask

In busy collision repair environments, masking materials need to be easy to handle and tough enough for real application demands.

Robustness, cutability and **tear resistance** all play an important role.

With 3M™ Plastic Sheeting, Masking Tapes and Specialty Tapes, collision repair professionals can work with products designed to handle repositioning, help reduce overspray risk and support a professional finish.
