RE: California Proposition 65

Dear Valued MSA Customer,

The California Proposition 65, officially known as the California Safe Drinking Water and Toxic Enforcement Act of 1986, seeks to protect California citizens from significant exposure to chemicals known to the state of California to cause cancer, birth defects, or reproductive harm. California Proposition 65 (CA Prop 65) requires businesses to provide clear and reasonable warnings before knowingly exposing Californians to chemicals listed in Proposition 65 List.

The list of chemicals included under California Proposition 65 is routinely updated. The current chemical list is located: <https://oehha.ca.gov/proposition-65/proposition-65-list>

MSA Product Stewardship has established processes to receive full material disclosure for the raw materials and components that are utilized in our products. This information is used to evaluate our products for California Proposition 65 chemicals and determine any required labeling. This information is updated and reviewed on a continual basis.

The MSA products that require notification of CA Proposition 65 are listed in the table attached to this document. If you have any further questions, please reach out via email.

Sincerely,

A handwritten signature in black ink that reads "Stephanie Reese". The signature is written in a cursive, flowing style.

Stephanie Reese
Director, MSA Global EHS & Product Stewardship
