Why choose 3M™ Sun Control Window Film Prestige Infrared Plus Series?

- Unique, breakthrough Multi-Layer Optical Film that stacks over 200 ultra-thin, nearly invisible layers.
- Interior or exterior applications that ensure low reflectivity from both sides, enhancing views and improving overall appearance.
- Allows you to stay cooler by reducing excessive heat in warmer months.
- Non-metalized film so there's no interference with mobile, WI-FI or GPS signals.
- Helps extend the life of furnishings by significantly reducing UV rays, the largest cause of fading.
- Comprehensive warranty from 3M.

3M | Sun Control Window Film
Prestige Infrared Plus Series

Designed to last. Made to outperform.

3M™ Sun Control Window Film
Prestige Infrared Plus Series

Our most advanced sun control window film yet

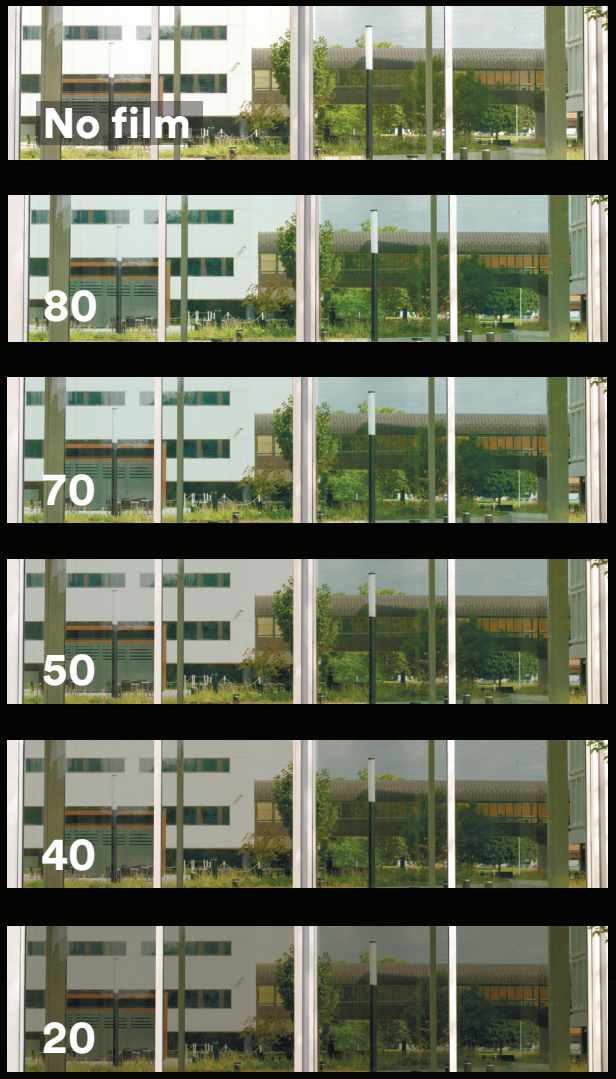

Our 3M™ Sun Control Window Film Prestige Infrared Plus Series goes beyond solar benefits to deliver smarter, more efficient, and more comfortable buildings where people feel and perform their best.

Powered by the latest breakthrough technology, our Multi-Layer Optical Film (MOF) stacks over 200 ultra-thin, nearly invisible layers. Each layer is designed to reflect infrared heat (the type that makes rooms hot) while still letting visible light pass through.

Unlike traditional films, it keeps interiors cooler while being virtually invisible and reduces glare without adding high reflectivity, so you maximize performance without compromising natural light or aesthetics.

Visible Light Transmission (VLT)
