Care and use

Please retain these instructions for future reference. Before using the cookware for the first time, ensure that it is thoroughly hand-washed. The cookware is suitable for use on hobs only, including induction, and for optimum energy efficiency, it is advisable to place the cookware on hob rings that correspond to the base size. Avoid allowing flames to overlap the sides or handles, and to prolong the lifespan of the cookware, use only silicone, wooden, or nylon utensils. Refrain from overheating the cookware or allowing it to boil dry, and never leave it unattended while in use. While the non-stick coating may experience discolouration with time, this will not affect the cookware's functionality. To prevent damage to ceramic hobs, always lift the cookware instead of dragging it across the surface. Be aware that screws may loosen over time; if this occurs, carefully retighten them with a screwdriver. When cleaning and storing the cookware, always allow it to cool before cleaning. It is safe to use in the dishwasher with mild detergents; otherwise, hand-wash it with a mild detergent and a non-abrasive sponge, rinsing and drying thoroughly afterwards. Never store wet cookware. Use caution by employing heat-resistant oven gloves when handling the cookware, and avoid exposing hot cookware to cold liquids. If there is any evidence of damage to the cookware, dispose of it carefully.
