3M Science. Applied to Life.™

One for All

Versatility applied to your body shop

3M™ Performance Spray Gun 2 is our next generation of the 3M™ Performance Spray Gun. It's more than just a spray gun– it's an application tool with precision performance you can rely on.

It allows you to spray virtually all common automotive coatings. Just by changing the nozzle, you can switch material within seconds from a heavy textured rocker guard coating to the finest clear coat atomization.

Use it with 3M™ HVLP or Fine Finish Atomizing Heads ranging from 0.9 to 2.0 sizes – the choice is yours.

Additional benefits of 3M™ Performance Spray Gun Series:

Cleans in Seconds

Faster Cycle Times

Precision Performance

Complete Coating Spray Solution

3M™ Performance Spray Gun 2

Optimized and redesigned for your application ease:

- Sleek gun frame – now made with carbon fiber - and smooth finish to help cleanability
- Laser marked control knobs
- Redesigned comfort trigger helps to provide an enhanced spraying experience

Adding to the ergonomic performance, its impact-resistant composite body makes it one of the lightest spray guns available. Designed to deliver best-in-class performance.

3M™ Performance Gravity Fine Finish Atomizing Heads

Designed for high performance coatings and optimized for the latest coating technologies, 3M™ Performance Fine Finish Atomizing Heads offer a controllable fine finish for all your applications.

3M™ Performance Gravity HVLP Atomizing Heads

Superior transfer efficiency and optimization for consistent atomization meet in our HVLP Atomizing Head technology. Enhanced material usage and mixing less paint - yet getting the same or better coverage is possible.

3M™ PPS™ Series 2.0 Spray Cup System

Choose the size that you need for your job, prepare and mix your material directly in the cup and connect it to the suitable atomizing head for your 3M™ Performance Spray Gun.

This system offers a complete disposable spray cup solution for mixing/measuring, filtering, spraying and for temporary sealing and protection of sprayable coatings.

Designed for all textures

Match various coating textures from very coarse to fine finish by combining the 3M™ Performance Spray Gun 2 with the 3M™ PPS™ Series 2.0 Type H/O Pressure Cup and Conversion Pack.

This powerful combination is specifically designed for applying high viscosity materials, such as protective coatings, that require pressure assistance in a gravity-fed delivery system.

The choice is yours - choose your nozzle type and size, then please always refer to the individual paint manufacturers product recommendations.
