Creston Highlands Vineyard

SUSTAINABILITY

Our Paso Robles winery is 100% powered by solar energy.

Our vineyards are planted with cover crops that replenish and enrich the soils, benefiting both the vines and the ecosystem.

Our Paso Robles Winery has on-site water treatment to recycle waste water for irrigation and more!

We utilize livestock in the vineyards to trim overgrowth and provide natural fertilizer.

CERTIFIED SUSTAINABLE

This logo indicates a wine is a CERTIFIED SUSTAINABLE California winery, using at least 85% grapes from certified vineyards, and 100% from California. Less than 5% of California wineries are certified sustainable.

KEY FACTS

- 100% Estate Vineyards
- Paso Robles, Monterey, and Napa estate vineyards
- Certified Sustainable
- Full Varietal portfolio
