DO NOT use any sharp objects to open plastic wrapped components as damage to product or components may result.

Warning:

CHOKING HAZARD - Small Parts. Adult Assembly Required.

Injuries may result from tipping furniture. You must install Tipping Restraint Hardware with the unit to prevent the unit from tipping and causing any accidental injury, instability, death or damage. OPTION 1: Attachment into a wall stud (preferred method)

Using a stud finder, locate a stud in the wall. Place your unit against the wall, with the safety bracket aligned in this location. To make driving the screw easier, you can drill a 1/8" diameter pilot hole (3mm) through the safety bracket into the stud. Drive the screw through the safety bracket into the wall stud. Tighten the screw that was not fully tightened in step 21.

OPTION 2: Attachment into drywall

Locate your unit where desired against a wall and mark the wall through the safety bracket, then move your unit aside. Drill a 3/16" diameter hole (5mm) into the wallboard. Tap the wall anchor into the hole until it is flush. Move your unit into location and fasten the wall bracket to the wall anchor with the screw. Tighten the screw that was not fully tightened in step 21.

STEP24

⑩ ALLEN KEY
1pc

Note: Before inserting each drawer, lift the drawer lock on the inside of the left side panel and insert the Allen Key into the 5th hole. Partially insert drawer, remove the Allen Key from the lock and let it fall back into the cabinet then close the drawer.
