

PAPER DRYWALL JOINT TAPE

Designed for use with joint compound for reinforcing joints and corners in gypsum drywall interiors. Special cross-fiber papers offer tensile strength both with and across the paper grain. Positive center creasing and uniform unwind for accurate, trouble-free application to angles and flat joints.

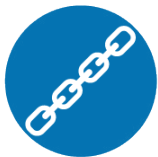

FEATURES & BENEFITS

Roughened surface provides superior bond to joint compound

Exceptional wet strength

Strength of paper resists tearing, stretching and distortion

Quick and easy to apply

MARKETS

- Consumer
- Building & Construction

APPLICATIONS

For repairing cracks, patching holes and mending seams in plaster and drywall
