

Famiglia RIVETTI

ABOUT FAMIGLIA RIVETTI

The Rivetti family has been in the wine business for five generations. In the 1960s, 70s, and 80s they were selling grapes and juice to other wineries. By working with some of the most prestigious wineries in the area, the family learned extensively about quality grape growing and winemaking. In 2000, they decided to start making their own wines and in 2001, produced their first vintage. Now, the winery is run by Massimo, his wife and the three sons. Famiglia Rivetti is the creative expression of his three sons, led by Davide Rivetti. He is committed to balancing tradition with modernity.

APPELLATIONS / TERROIR

LANGHE ARNEIS

LANGHE NEBBIOLO

BARBARESCO

BAROLO

LANGHE REGION, PIEDMONT

The Rivetti family carefully sources grapes from ancient vines in the calcareous soils of **Mango, Neive, Alba and La Morra**. These old vines yield a limited quantity per hectare, ensuring grape quality and the complexity of flavors. Nebbiolo grapes sourced from the **Mango** and **Alba** regions thrive in a mixed limestone terroir, where limited yields per hectare elevate grape quality and flavor complexity. The Nebbiolo and Arneis grapes sourced from the renowned **Neive** region, thrive in a unique blend of chalky clay soil with controlled yields per hectare. This approach aims to elevate grape quality and enhance flavor complexity. In the **La Morra** region, Nebbiolo grapes that produce a remarkable Barolo are nestled at an elevation of 450 meters, the vines stand sentinel against the expansive landscape. Their roots grow deep into a fertile blend of chalky clay, imparting a unique character to the fruit.

Famiglia RIVETTI

THE WINEMAKING

Famiglia Rivetti Winery—with its 62 acres of vineyards cultivated under the EU organic certification—grows both traditional and international grapes. Over twenty different herbs are planted to grow with the vines to avoid any pesticide use. Natural fermentation with indigenous yeasts is used to represent the varietal and terroir. The flavor of the grapes is preserved through minimal use of sulfites and no filtration on the red wines.

TECHNICAL INFORMATION

Varietal	Langhe Arneis	Langhe Nebbiolo	Barbaresco	Barolo
