

2023 SAN SIMEON PASO ROBLES SAUVIGNON BLANC

Region/Vintage Notes

Out of the Creston District AVA in Paso Robles, our 2023 San Simeon Sauvignon Blanc comes from two estate vineyards within this relatively new region. Known for its rolling hills and well-drained Arbuckle-Positas soils, 53% of the blend comes from our Riboli Creston Vineyard. Added complexity of this Sauvignon Blanc comes from the steep terrain with soils derived from calcareous marine deposits at our Creston Highlands Vineyard. The Creston District, one of eleven sub-districts that make up the Paso Robles AVA, is known for its warm yet dry climate, tempered by cooling breezes flowing through the Templeton Gap to the west. This area's diurnal temperature swings can be as high as 50 degrees, ideal for long growing seasons. The 2023 growing season was wet and cool followed by a mild summer, allowing the berries to size up with very little dehydration and provide great balance due to longer ripening time.

Winemaker/Tasting Notes

Harvested in late September, the 2023 San Simeon Sauvignon Blanc was fermented in 100% stainless steel to preserve varietal freshness and acidity, followed by several months spent resting in tank prior to bottling. Filled with aromas of white flowers and honey followed by fresh, grassy notes on the nose of this bright, well-balanced wine. The rich palate shows classic Sauvignon Blanc favors of bright citrus, pear, and lime zest along with a slight hint of minerality. Balanced acidity and a long finish make this wine ideal for a warm summer afternoon.

Sustainability

Sustainability is a top priority at San Simeon. Our Paso Robles Vineyards are certified sustainable by the rigorous California Sustainable Wine Alliance (CSWA). At our certified sustainable Paso Robles winery, solar panels provide 100% of the needed electricity, and wastewater is effectively reclaimed and recycled for additional use.
