

Hydrogel Pads

Sooth and protect cracked nipples instantly

Reduce Early Weaning Risk

Latching issues and soreness can lead to painful, cracked nipples with up to **97% of mothers reporting dry skin and nipple pain**. Because discomfort can inhibit milk ejection,² and commonly leads to early weaning,^{3,4} providing mothers relieve is critical.

Soothing Cracked Nipples

Hydrogel Pads provide instant pain relief^{5, 6} and support tissue recovery by creating a moist wound environment that promotes healing⁷ while providing a barrier against rubbing and friction. **Reusable for 24 hours.**
