

Both a Ballet Dancer and a Linebacker

20-Amp Constant + 45-Amp Power Correction & Current Reservoir:

A great audio or home theater system needs muscle — the more the better.

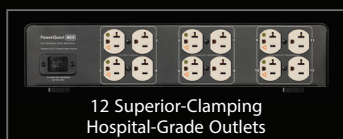

Linear Filtering (Differential & Common Mode):

A great audio or home theater system needs ultimate delicate finesse — a black background against which the tiniest detail is audible and visible.

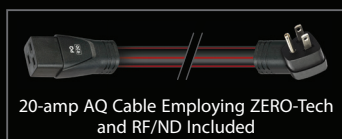

Protection:

And, of course, like the PQs 2, 3, 303, 505, & 707, the PQ-909 has Non-Sacrificial Surge Protection, capable of withstanding repeated 6000V/3000A surges — the maximum that can pass through a building's AC electrical panel.

Power Meets Grace in the PQ-909.

12 Superior-Clamping
Hospital-Grade Outlets

20-amp AQ Cable Employing ZERO-Tech
and RF/ND Included
