

Waterless Milk Warmer™

Safeguarding Vulnerable Infants with Waterless Warming Technology

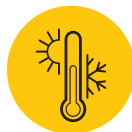

The Waterless Milk Warmer™ is the ONLY neonatal milk warmer standardizing infant feeding temperatures using innovative forced dry convection heat technology.

This practical solution eliminates potential sources of water contamination in healthcare facilities while preserving human milk's integrity and nutritional value.

The ONLY Forced Dry Convection Heat Technology:

Eliminating the use of water for thawing and warming reduces the risk of waterborne infection and meeting CDC recommendations¹.

Standardized Temperature Control:

Consistently warms feeds to body temperature (30-38°C / 86-100°F), preserving the integrity of human milk and enhancing feeding tolerances for vulnerable infants².

Compact and Versatile Design:

On an IV pole next to each patient's bed or on a counter top for convenient feed preparation.

Hold Pattern Functionality:

Preserving milk integrity and improve nurse workflow by maintaining milk at optimal temperature for up to 30 minutes.

Hygienic and Safe:

Single-user, disposable, and recyclable inserts are replaced every 12 hours to reduce cross-contamination and protect vulnerable infants from external contaminants and bacteria.

Seamlessly Works with Most Collection Containers and Syringes

NEW!
Now works
with Colostrum
Protectors

Colostrum Protectors:

Fully compatible with the NEW Colostrum Protector when freezing, thawing or warming colostrum is needed.

Collection Containers:

Compatible with plastic or glass human milk containers up to 250mL and 162mm in height.

Syringes:

Works effortlessly with plastic syringes up to 60mL, thanks to the easy integration of the Syringe Port.

Versatile Bulk Prep Solution with Transfer Lid

Designed for bulk feeding efficiency, the transfer Lid allows single-feed access while minimizing the risk of cross-contamination.

- Reduces risk of contamination
- Prevents spills or loss of breast milk
- Available in oral slip tip or ENFit – not compatible with I.V.
- Sterile and ready to use
