fresh®
PRODUCTS
Keeping your world smelling fresh.

air365™

Freshen large spaces
for an entire year.

Create a great first impression

Create an inviting environment for spaces up to 1,000 sq ft. and enhance the guest experience with luxury fragrances.

By adding fragrance to your space, you'll help lengthen the time patrons spend with you. Additionally, a well-scented work environment can significantly impact employee productivity, well-being, and retention.

100% Pure fragrance

Most liquid and aerosol air fresheners contain **5% to 20% fragrance**, with the remaining 80% comprising of inexpensive solvents/diluents. Since air365 is 100% pure fragrance, you know you're getting the best fragrance experience possible.

It also enables us to offer 5x more fragrance than competitors, all in one compact bottle.

Easy to set up

Freshness doesn't get much easier than this. Install it once by simply plugging it in, and you're done. Say goodbye to programming and cleaning. Your year-long freshness deserves to be hassle-free.

Maintenance free for a year

air365 eliminates the time it takes to change out air freshener refills from 12 times per year to just once per year.

It also eliminates gaps in odor control. On average, monthly air fresheners are typically only replaced 2 out of 12 times per year, but odors linger.

Consistent air care

Our sensor-based measuring system allows us to achieve consistent fragrance output for an entire year. Sensors monitor and adjust fragrance output, to compensate for variations caused by:
