ALASKAN

In the 1950's and 60's, Bear Archery produced the ALASKAN - a bow with performance the industry had never seen at an unbeatable value. For 2022, the ALASKAN returns with a spin. This technology and performance packed 32" axle-to-axle bow comes equipped with an all-new DHC hybrid cam. The DHC hybrid cam system features a relaxed 80% let off without sacrificing Bear's signature draw cycle smoothness. The new KillerWave in-limb dampeners assist in eliminating vibration and improving accuracy in each shot. The 2022 ALASKAN offers respectable arrow speeds up to 335 FPS and an incredible amount of adjustability in draw length from 25.5"-31".
