

Magic InBra™

The gentle wearable breast pump for unmatched performance

Magic InBra™ with FluidFeel Technology – gentle pumping, even at strong vacuum.

Integrating pumping sessions into the busy day-to-day can be challenging for a new mother. This is why Magic InBra™ comfortably fits into her bra and her routine.

Ultra slim anatomic design
with 105° shield for up to 11.8% more milk¹

Silent
only 38dB

Night mode
with tunnel light

Leakproof flexibility
thanks to constant latch

Responsive and reliable performance
Sensor controlled for vacuum stability

Closed system
prevents breast milk from entering the motor

Hospital performance
with similar pumping pattern as clinically proven Symphony®

FluidFeel TECHNOLOGY™

Transparent top-view
for easy nipple alignment and visibility on milk flow

Ultra lightweight
only 200g

Remote control and easy tracking
via app

Capacity
of 150 mL

Easy to clean
dishwasher safe

Double pumping
for up to 18% more milk with more energy in half the time²

Rechargeable battery
for 2 hrs pumping time. With battery status indicator

FluidFeel Technology™ – A Scientific First.

FluidFeel TECHNOLOGY™

Developed through extensive research of infant feeding behavior and breast physiology, FluidFeel Technology™ represents the natural evolution of Medela's scientific expertise.

- Creates optimized pumping environment through enabling warm milk circulation around the nipple, mimicking a natural feeding sensation^{6,7,8}
- Features a gentle latch mechanism that minimizes nipple movement while enabling strong milk flow
- Advanced sensors help to adjust vacuum performance to individual milk flow patterns⁹
- Maintains stable vacuum levels throughout each pumping session with similar pumping pattern to Medela's hospital and rental pump Symphony® while remaining gentle on breast tissue^{10,11}
- Ensures a comfortable pumping experience without compromising on performance

What's Included:

- 1–Fully assembled breast pumps with 21 mm breast shields (x2)
- 2–24 mm breast shields (x2)
- 3–Yellow container membranes (x2)
- 4–Yellow milk valves (x2)
- 5–Grey shield valves (x2)
- 6–USB-C cable (x1)
- 7–Instructions for use (x1)
